

# CONTENTS

Preface

- Opening remarks— Sir ERIC K. RIDEAL (*U.K.*) 1
- Introductory lecture—J. G. OVERBEEK (*The Netherlands*) 3

## The BET Method

- BE' method— H. DE BOER (*The Netherlands*)
- Utilisation of adsorption data in the BET region— K. S. W. SING  
(*U.K.*) 25
- Surface area of adsorbed gases on pristine E-glass fibre of known  
area— V. R. DEITZ and N. H. TURNER (*U.S.A.*) 43
- Comparison of DKR and BE monolayer values— D. KLEMPERER  
(*U.K.*)
- Comparison of monolayer capacities from BET and DKR isotherms—  
B. A. GOTTWALD (*Germany*) 59

## Porous Solids

- Surface areas of porous solids— S. BRUNAUER (*U.S.A.*) 63
- Surface area in intermediate pores— J. C. P. BROEKHOFF and H.  
BOER (*The Netherlands*) 97
- On the surface of non-porous and porous adsorbents— M. M. DUBININ  
(*U.S.S.R.*) 123
- On the application of the t-plot method to real microporous systems  
—A. P. KARNAUKHOV (*U.S.S.R.*) 141

## Heterogeneous Surfaces

- The effect of substrate heterogeneity on the determination of surface  
area by gas adsorption— S. ROSS (*U.S.A.*) 43
- Surface concentration of hydroxyl groups on amorphous silicas having  
different specific surface areas— L. T. ZHURAVLEV and A. V. KISELEV  
(*U.S.S.R.*) 155

## CONTENTS

Effect of surface hydration on the adsorption of nitrogen and argon by thorium oxide—R. B. GAMMAGE, E. L. FULLER and H. F. HOLMES (U.S.A.)	161
High productive chromatographic methods for determination of the total and active surface area of catalysts—A. P. KARNAUKHOV and N. E. BUYANOVA (U.S.S.R.)	165
Determination of small surface areas by nitrogen adsorption—G. H. B. LOVELL (South Africa)	171
ESR methods for the active surface area determination of catalysts—J. L. GARNETT and A. T. T. OEI (Australia)	177
<b>Low Adsorption Methods</b>	
The application of high temperature/low coverage gas adsorption measurements to the determination of the surface areas of solids—D. H. EVERETT (U.K.)	181
Helium adsorption at room temperature and adsorption isotherms—J.-B. DONNET and B. LESPINASSE (France)	211
<b>Methods for Small Surface Areas</b>	
Low surface area determination—G. BEURTON and P. BUSSIÈRE (France)	217
<b>Flow Methods</b>	
Surface aspects of flow in microporous membranes—R. M. BARRER (U.K.)	227
Effects of adsorption dynamics on surface area determination—S. TILENSCHI (Rumania)	
<b>Clays</b>	
Determination of surface areas of clays—evaluation of methods—H. VAN OLPHEN (U.S.A.)	255
<b>Methods Based on Liquid-Solid Interaction</b>	
On the use of adsorption measurements from solutions of non-electrolytes for surface area determination—G. SCHAY (Hungary)	273
Determination of the surface area of solids from solution adsorption—YU. A. ELTEKOV (U.S.S.R.)	
Determination of the accessible surface area of porous silicas by the adsorption of polystyrene—YU. A. ELTEKOV (U.S.S.R.)	

## CONTENTS

Specific surface areas of graphitized carbon blacks from heats of immersion—J. H. CLINT, J. S. CLUNIE, J. F. GOODMAN and J. R. TATE (U.K.)	299
Determination of basal plane and polar site areas in graphites and graphitized carbons—A. J. GROSZEK (U.K.)	313
Use of dyes for specific surface measurement—C. H. GILES, A. P. D'SILVA and A. S. TRIVEDI (U.K.)	317
Measurement of surface area by the adsorption of dyes from solution—J. F. PADDAY (U.K.)	331
Specific surface areas by negative adsorption—J. LYKLEMA and H. J. VAN DEN HUL ( <i>The Netherlands</i> )	341
<b>Other Methods</b>	
Small angle scattering of X-rays—A. RENOUPREZ ( <i>France</i> )	361
Optical microscopy for particle size analysis—M. I. BARNETT (U.K.)	369
Calculation of the specific surface of a powder—H. HEYWOOD (U.K.)	375
Work of the British Standards Institution Committee on Surface Area Determination—A. S. JOY (U.K.)	391
The determination of surface areas on titanium <sup>TiO<sub>2</sub></sup> dioxide pigments—D. URWIN (U.K.)	
A comparison of the surface area of a standard sample of silver iodide as measured by different methods in different laboratories—J. F. PADDAY (U.K.)	401
