1. INTRODUCTION	1
Plan of Book	1
Glossary	1
2. SURFACE ENERGY AND SURFACE TENSION	7
Surface Free Energy	7
Surface Entropy and Energy	8
Effect of Temperature on Surface Tension	9
Parachor	10
Effect of Pressure on Surface Tension	10
Effect of Surface Curvature	10
Work of Cohesion and Adhesion	12
Surface-Tension Values	12
Surface Tension of Solutions	13
Gibbs Adsorption Equation	16
Surface Tension Measurements	18
Capillary Rise	18
Maximum Bubble-Pressure Method	19
Drop Weight Method	19
Wilhelmy Slide Method	20
Ring Method	20
Static Drop Methods	20
Dynamic Methods	21
3. PHYSICAL ADSORPTION BY SOLIDS	23
Adsorption of Gases	23
Gibbs Adsorption Isotherm	24
Langmuir Equation	25
Types of Adsorption Isotherms	26
BET Adsorption Theory	28
Harkins and Jura Method	33
Absolute Method of Harkins and Jura	36
Equations of State of Adsorbed Films	41
Adsorption from Solution	45
Adsorption Isotherms	45
Forces of Adsorption	48
Measurement of Surface Area by Fatty Acid Adsorption	51
Measurement of Surface Area by Dye Adsorption	54
Soap Titration Method	55
4. CHEMISORPTION	61
Nature of Chemisorption	61
Experimental Methods	64

Electrical Double Layer	--
Potential Difference across an Interface	70
Diffuse Double Layer	79
Stern Treatment of the Double Layer	79
Electrocapillary Effects	--
Electrokinetic Phenomena	78
Electro-osmosis	79
Electrophoresis	79
Streaming Potential	80
Migration Potential	81
The Zeta Potential	81
Flocculation and Dispersion	82
Rapid Coagulation	82
Slow Coagulation	82
Theory of Verwey and Overbeek	84
Attractive Forces between Particles	89
Total Interaction between Particles	90
Validity of Verwey-Overbeek Theory	92
Schulz-Hardy Rule	92
Surface Potential	94
Specific Effects of Counter-Ions	94
Rate of Flocculation	94
Secondary Minimum	95
6. INSOLUBLE MONOLAYERS AT LIQUID INTERFACES	97
Film Balance	97
Orientation of Molecules in Monolayers	98
Surface Phases	101
Film Potential	103
Surface Viscosity	105
Evaporation of Water through Monolayers	105
Energy Relations in Monolayer Formation	109
Transfer of Monolayers	110
Mixed Monolayers	111
Reactions in Monolayers	114
Monolayer Penetration	115
Insoluble Monolayers on Organic Liquids	117
7. SOLUBLE MONOLAYERS AT LIQUID INTERFACES	121
Adsorbed Nonionic Compounds	121
Surface Pressure	121
Surface Potential	123
Energy Relations	124
Nonionic Surfactants	125
Adsorbed Ionic Compounds	126
Gibbs Adsorption Isotherm	126
Adsorption Isotherms	127
Saturation Adsorption	129
Charged Monolayers	130
Equations of State	132
Radiotracer Studies of Adsorption	133
Radiotracer Method	133
Aerosol OTN Adsorption	134
Tritiated Sodium Dodecylsulfate	137

8. SURFACTANTS	144
Oil-Soluble Surfactants	145
Water-Soluble Surfactants	146
Anionic Surfactants	146
Soaps	146
Sulfonates	147
Sulfates	153
Cationic Surfactants	154
Nonionic Surfactants	156
Fatty Alkanolamides	156
Ethylene-Oxide-Derived Nonionic Surfactants	156
Sugar Esters	159
Amphoteric Surfactants	160
Miscellaneous Types	161
Polymeric Surfactants	161
Fluorocarbon Surfactants	161
9. PROPERTIES OF SOLUTIONS CONTAINING SURFACTANTS	163
Critical Micelle Concentration	164
Effect of Salts	167
Effect of Structure on CMC	168
Mixtures of Surfactants	170
Effect of Polar Compounds on the CMC; Effect of Temperature	171
Shape of Micelles	174
Micellar Size and Charge	176
Energetics of Micelle Formation	182
Determination of Critical Micelle Concentration	185
Effect of Temperature on Solubility	189
Solubilization	191
Effect of Structure of Solubilizer	192
Effect of the Nature of the Solubilize	194
Effect of Added Electrolyte	195
Effect of Added Non-Electrolyte	195
Ternary Systems	196
Surfactant-Water-Electrolyte Systems	197
Surfactant-Water-Insoluble Compound	198
Intermicellar Equilibrium	201
R-Theory of Solubilization	202
Non-Aqueous Systems	210
Micelle Formation in Non-Polar Solvents	210
Determination of Micellar Size by Fluorescence	213
Nonionic Surfactants	215
Critical Micelle Concentrations	216
Solubility	221
Viscosity	223
Gross Properties	225
Fluorocarbon Surfactants	225
10. WETTING	232
The Contact Angle	232
Equations of Wetting	234

Spreading of Pure Liquids on Low-Energy Solids	
Spreading of Pure Liquids on Monolayers	
Non-Spreading of Mixtures of Organic Liquids	
/ Wetting by Aqueous Solutions	
/ Wetting of High-Energy Surfaces by Organic Liquids	
/ Effect of Temperature on Wettability	
Spreading on Organic Liquids	
Hysteresis of Contact Angle	
/ Surface Roughness	
Contact Angles involving Two Liquid Phases	
Capillary Wetting	
/ Wetting of Cotton Yarn by Aqueous Surfactant Solutions	
Wetting by Liquid Metals	
Surface Tension of Solids	
Surface Tension of Mixtures	
Surface Tension of Inorganic Compounds	
Interfacial Tension	
Wetting of Solid Surfaces	
11. EMULSIONS	295
Physical properties of Emulsions	297
Particle Size and Size Distribution	297
Optical Properties	299
Electrical Properties	302
Rheology	305
Preparation of Emulsions	309
Hydrophile-Lipophile Balance (HLB)	311
Emulsion Stability	315
Flocculation	316
Electrical Double Layer at the Oil-Water Interface	316
Surface-Charge Distribution	317
Potential Energy of Interaction	323
Approximate Equation for Flocculation Rate	327
Coalescence	328
Emulsion Stability and Emulsion Type	329
Mixed Surface Films	334
Mechanical Stabilization of Emulsion	335
Review of Factors involved in Emulsion Stability	336
Micro Emulsions	337
Negative Surface Tension	338
Mechanism of Formation of Micro Emulsions	339
Preparation of Micro Emulsions	340
12. FOAMS	
Single Soap Films	344
Foam Stability	347
Viscous Surface Films	350
Interaction of Polar Additives in Foams and Micelles	358
Foam Inhibition	368
Antifoaming Agents	373
Action of Foam Stabilizers and Antifoams	375
13. DETERGENCY	377
Nature of the Soil	378

	Microscopic Study of Soiled Fabrics in Aqueous Media	417
	Microscopic Study of Soiled Fabrics in Detergent Solutions	418
	Cryoscopic Theory of Detergency	418
	Rolling-up Process in Detergency	419
	Soil Removal and Surfactant-Monomer Concentration	423
	Adsorption	425
	Effect of Nature of Surfactant and Substrate on Adsorption	428
	Effect of Builders on Surfactant Adsorption	428
	Soil Redeposition	429
	Role of Foam in Detergency	
	Mechanisms of Detergency	
14.	ORE FLOTATION	417
	Flotation Reagents	418
	Differences between Collector Types	418
	Mixed Interfacial Films	419
	Activators and Depressors	423
	Selective Flotation of Salts	425
	Native Flotability	428
	Mechanism of Ore Flotation	429
15.	LUBRICATION	432
	Effect of Adsorbed Gases on Friction	432
	Effect of Films of Long-Chain Polar Compounds on Friction	437
	Durability of Surface Films	441
	Extreme Boundary Lubrication	445
16.	CORROSION INHIBITION	451
	Corrosion Inhibition with Monomolecular Films	451
	Passivity and Chemisorption	452
	Protective Films and Passivity	458
	AUTHOR INDEX	461
	SUBJECT INDEX	469
