

Contents

<i>List of Contributors</i>	v
<i>Preface</i>	vii
<i>Contents of Volume II</i>	xi
1. Lewis Acid-Base Interactions in Polar Non-Aqueous Solvents	
DEVON W. MEEK	
I. Introduction	1
II. The Character of Acids and Bases	3
III. A Coordination Model for Polar Non-Aqueous Solvents	17
IV. Correlation of Chemical Reactions in Non-Aqueous Solvents	44
V. Conclusion	62
References	62
2. Solvation of Electrolytes and Solution Equilibria	
ELTON PRICE	
I. Introduction	67
II. Experimental Evidence for Solvation of Electrolytes	68
III. Ion-Solvent Interaction and Dissociation of Electrolytes	85
References	94
3. Acidity Functions for Amphiprotic Media	
ROGER G. BATES	
I. Introduction	98
II. Concepts of Acidity in Amphiprotic Media	99
III. Solvent Effects on Acid-Base Reactions	99
IV. Activity Coefficients, Salt Effects, and Medium Effects	101
V. Acidity Potentials	103
VI. Medium Effect for Hydrogen Ion	105
VII. Absolute Electrode Potentials	108
VIII. A Practical pH Scale for Amphiprotic Solvents	109
IX. pD Scale in Deuterium Oxide	114
X. Other Electrochemical Acidity Functions	116
XI. Hammett Acidity Functions	118
XII. Related Indicator Acidity Functions	126
XIII. Choice of Acidity Function	126
References	127

4. Electrode Potentials in Non-Aqueous Solvents**H. STREHLOW**

I. Introduction	129
II. Experimental Data	133
III. Comparison of Voltage Series in Different Solvents	140
References	169

5. Solvent Extraction of Inorganic Species**LEONARD I. KATZIN**

I. Introduction	173
II. Types of Aqueous Equilibria Determining Extractability	176
III. Solute-Solvent Relations in the Organic Phase	177
IV. Extraction Systems	178
References	205

6. Experimental Techniques for Low-Boiling Solvents**JINDŘICH NASSLER**

I. Introduction	214
II. Basic Preparative Manipulations	216
III. Physical Measurements	257
IV. Safety Rules	283
References	284

7. Experimental Techniques in the Study of Fused Salts**R. A. BAILEY and G. J. JANZ**

I. Introduction	292
II. Melts and Purification	292
III. Container Materials	297
IV. Heating and Temperature Control	298
V. Electrochemical Techniques	299
VI. Spectroscopic Techniques	321
VII. Transport Techniques	331
VIII. Thermodynamic Techniques	343
IX. Other Techniques	353
References	362
