

## INTRODUCTION AND DEFINITIONS

- |     |  |   |
|-----|--|---|
| 1.1 | Definition and classification of solutions |   |
| 1.2 | Composition scales . . . . .               | 2 |
| 1.3 | Mass fraction . . . . .                    | 2 |
| 1.4 | Mole fraction . . . . .                    | 2 |
| 1.5 | Volume fraction . . . . .                  | 2 |
| 1.6 | Molality and concentration . . . . .       | 4 |
| 1.7 | Phase diagrams . . . . .                   | 4 |

## OBSERVED PROPERTIES

### SOLUTIONS

- |      |  |   |
|------|--|---|
| 2.1  | Gaseous mixtures . . . . .   |   |
| 2.2  | Solubility of liquids in liquids . . . . .   |   |
| 2.3  | Solutions of solids in liquids . . . . .   | 1 |
| 2.4  | Freezing point depression . . . . .  | 2 |
| 2.5  | Dilute solutions . . . . .   | 2 |
| 2.6  | Depression of vapour pressure and elevation of boiling point by involatile solutes . . . . . | 2 |
| 2.7  | Osmotic pressure . . . . .   | 2 |
| 2.8  | Mixtures of volatile liquids . . . . .   | 2 |
| 2.9  | Fractional distillation . . . . .  | 2 |
| 2.10 | Liquid-vapour equilibrium in partially miscible system . . . . .                             | 4 |
| 2.11 | Thermal effects in liquid mixtures . . . . .   | 4 |
| 2.12 | Directions of deviations from Raoult's law . . . . .   | 4 |
| 2.13 | Solutions of gases in liquids . . . . .  | 4 |

## CHAPTER 3

## THERMODYNAMIC BEHAVIOUR OF MIXTURES AND SOLUTIONS

3.1	Introduction . . . . .	5
3.2	Partial molar properties . . . . .	5
3.3	Equations of state for gases . . . . .	5
3.4	Thermodynamic properties of the perfect gas . . . . .	5
3.5	Mixtures of perfect gases . . . . .	5
3.6	Imperfect gases . . . . .	6
3.7	Mixtures of real gases . . . . .	6
3.8	Ideal mixing of imperfect gases . . . . .	6
3.9	Mixtures of liquids . . . . .	6
3.10	Non-ideal mixtures of liquids . . . . .	7
3.11	Excess functions and activity coefficients . . . . .	7
3.12	Relations between activity coefficients . . . . .	7
3.13	Thermodynamic properties at constant volume . . . . .	8
3.14	Henry's law . . . . .	8
3.15	Azeotrope formation . . . . .	8
3.16	Critical solution temperatures . . . . .	8
3.17	Distribution of a solute between two immiscible solvents . . . . .	9
3.20	Elevation of boiling point . . . . .	
3.21	Osmotic pressures . . . . .	

## CHAPTER 4

## EXPERIMENTAL METHODS

4.1	Dynamic vapour pressure measurements . . . . .	10
4.2	Static methods . . . . .	10
4.3	Isopiestic methods . . . . .	11
4.4	Gas chromatographic methods . . . . .	11
4.5	Heats of mixing . . . . .	11
4.6	Volumes of mixing . . . . .	11
4.7	Thermal pressure coefficients . . . . .	11

## CHAPTER 5

## THEORETICAL ASPECTS OF NON-ELECTROLYTE SOLUTIONS

5.1	Introduction . . . . .	134
5.2	Intermolecular forces . . . . .	138
5.3	Repulsions between molecules . . . . .	142
5.4	Interactions between unlike molecules . . . . .	145
5.5	The liquid state . . . . .	148
5.6	The solubility parameter treatment of mixtures . . . . .	152
5.7	Comparison of solubility parameter and regular solutions treatments with experiment . . . . .	156
5.8	Simple lattice theory . . . . .	163
5.9	Solutions of polymers . . . . .	170
5.10	Cell theory of mixtures . . . . .	177
5.11	Application of the principle of corresponding states . . . . .	177
