CONTENTS

PREFACE XI

LIST OF CONTRIBUTORS XIII

Chapter 1 INTRODUCTION

1.1 Introduction
(I. Tanaka)

General Aspects of Photochemistry. Search for New Basic Types of Photochemical Reactions
(K. Tokumaru, T. Arai, and T. Karatsu) 5

Chapter 2 PHOTOCHEMICAL TECHNIQUES TO UNDERSTAND PHOTOCHEMICAL AND PHOTOPHYSICAL FEATURES ON SOLID SURFACES

2.1 Fluorescence and Transient Absorption Spectra of Solid Surface: Development of Time-Resolved Total Internal Reflection Spectroscopy
(H. Masuhara) 15

2.2 Laser Flash Photolysis on Solid Surface
(F. Wilkinson and G. P. Kelly) 30

2.3 Excimer Formation with Pyrenes on Silica Surfaces
(K. A. Zachariasse) 48

2.4 Photophysics of Acridone, N-Methylacridone, Acridine, and Pyrene Adsorbed on Silica Gel
(S. Suzuki and T. Fuiii)

2.5 Heterogeneous Molecular Environments Probed by Fluorophores Bonded to Chemically Modified Silica Gel: Fluorescence Decay Measurements under a Microscope
(S. Hirayama, T. Kubo, and H. Yamasaki) 93

2.6 Photoacoustic and Fluorescence Measurements of Energy Transfer in Adsorption Layers
(H. D. Breuer) 106

Chapter 3 SPECIFIC FEATURES OF PHOTOCHEMICAL REACTIONS ON SOLID SURFACES

3.1 Photochemistry of Alkyl Ketones in the Adsorbed State: Effects of Solid Surfaces upon the Photolysis
(M. Anpo) 119

3.2 Decomposition of Azocumene on Silica Surfaces
(J. E. Leffler and J. J. Zupancic)

3.3 Photolytic and Redox Mechanisms for the Photodecomposition of Ethanoic Acid Adsorbed over Pure and Mixed Oxides
(M. Schiavello, V. Augugliaro, S. Coluccia, L. Palmisano, and A. Sclafani) 149

3.4 ESR Studies of Alkyl Radicals Adsorbed on Porous Vycor Glass
(H. D. Gesser) 168

Chemiluminescence Properties of Adsorbed Biacridylidenes
(K. Maeda and S. Yamada) 184

Chapter 4 NEW DEVELOPMENTS OF ORGANIC PHOTOCHEMISTRY ON SOLID SURFACES

4. Photochemistry of Dibenzyl Ketone Adsorbed on Size/Shape Selective Faujasite Zeolites: Steric Effects on Product Distributions
(N. J. Turro and Z. Zhang)

4.2 Photochemistry of Organic Cations at Charged Interfaces
(C. A. Backer and D. G. Whitten) 216

Electron Transfer between Adsorbed Dye Molecules and Organic Crystals: Model Character of the Adsorption System for Certain Aspects in Photosynthesis
(K. Kemnitz, N. Nakashima, and K. Yoshihara) 236

Chapter 5 NEW DEVELOPMENTS OF INORGANIC PHOTOCHEMISTRY ON SOLID SURFACES

Inorganic Photochemical Reactions in Low Temperature Matrices and in the Surfaces of Solids
(T. Tominaga) 255

Photochemistry of Metal Carbonyls Physisorbed on Porous Vycor Glass
(H. D. Gafnev) 272

Photochemistry of Silica-Adsorbed $Fe(CO)_5$
(R. L. Jackson) 289

5.4 Photopreparation of Supported Metal Oxide and Metal Carbonyl Catalysts
(A. Morikawa and Y. Wada) 303

Chapter 6 LASER INDUCED PHOTOREACTIONS AND PHOTO-CVD ON SOLID SURFACES

6.1 UV Laser Photodissociation of Small Molecules on Solid Surfaces
(H. Sato and M. Kawasaki) 317

CO_2 Laser Induced Surface Reaction
(M. Kawai) 329

Photochemical Aspects of Amorphous-Si Nucleation by Photo-CVD
(H. Hada and M. Kawasaki) 339

Chapter 7 TOPICS OF PHOTOCHEMISTRY ON SEMICONDUCTING MATERIALS

7.1 Photoprocesses on Fractal Surfaces
(A. Seri-Levy, J. Samuel, D. Farin, and D. Avnir)

7.2 New Aspects in Area-Selective Electrode Reactions on Illuminated Semiconductors
(M. Okano, R. Baba, K. Itoh, and A. Fujishima)

7.3 Photoluminescent Properties of Cadmium Sulfide Contacted with Gaseous Lewis Acids and Bases
(G. J. Meyer, E. R. M. Luebker, G. C. Lisensky, and A. B. Ellis)

7.4 Fluorescence of Dye Molecules Adsorbed on Semiconductor Surfaces
(A. M. Ponte Goncalves)

Chapter 8 APPLICATIONS OF PHOTOCHEMISTRY TO OPTICAL MEDIA

Photostability of Near-Infrared Absorbing Organic Dyes in New Optical Media
(H. Nakazumi and T. Kitao)

8.2 Photoinduced Phase Transition in Liquid Crystals
(S. Tazuke and S. Kurihara)

Photochemical Surface Reactions of Polymeric Systems: Lithographic Applications
(H. Hiraoka)

Chapter 9 RECENT DEVELOPMENTS OF PHOTOCHEMISTRY IN LIQUID CRYSTALS AND PROTEINS

9.1 Photoreactivity of Carbonyl Compounds in the Solid State
(Y. Ito)

Ketone Photochemistry as a Probe of Conformation Mobility in Nematic and Smectic Liquid Crystals
(W. J. Leigh)

9.3 Absolute Asymmetric Synthesis via Photochemical Reactions of Chiral Crystals
(J. R. Scheffer and M. Garcia-Garibay) 501

9.4 Fluorescence Quenching of Pyrene as a Monitor of Intermolecular Diffusion and Intramolecular Chain Bending in Cholesteric Liquid Crystalline Phases(1)
(M. F. Sonnenschein and R. G. Weiss)

9.5 Dynamics of Excited State Relaxations in Some Proteins
(F. Tanaka and N. Mataga) 551

SUBJECT INDEX
