

# CONTENTS

Preface .....	ix
1. The Influence of Surface Orientation and Crystal Imperfections on Photoelectrochemical Reactions at Semiconductor Electrodes . H. Gerischer	1
2. Carrier Recombination at Steps in Surfaces of Layered Compound Photoelectrodes .....	17
H. J. Lewerenz, A. Heller, H. J. Leamy, and S. D. Ferris	
3. Rate of Reduction of Photogenerated, Surface-Confined Ferricenium by Solution Reductants: Derivatized <i>n</i> -Type Silicon Photoanode-Based Photoelectrochemical Cells .....	37
N. S. Lewis and M. S. Wrighton	
4. Chemical Control of Surface and Grain Boundary Recombination in Semiconductors .....	57
A. Heller	
5. Charge-Transfer Processes in Photoelectrochemical Cells .	79
D. S. Ginley and M. A. Butler	
6. The Role of Interface States in Electron-Transfer Processes at Photoexcited Semiconductor Electrodes .....	103
R. H. Wilson	
7. Competing Photoelectrochemical Reactions on Semiconductor Electrodes .....	119
W. P. Gomes, F. Van Overmeire, F. Vanmaekelbergh, F. Vanden Kerchove, and F. Cardon	
8. Factors Governing the Competition in Electrochemical Reactions at Illuminated Semiconductors .....	131
H. Tamura, H. Yoneyama, and T. Kobayashi	
9. Electrochemical Behavior and Surface Structure of Gallium Phosphide Electrodes .....	145
Y. Nakato, A. Tsumura, and H. Tsubomura	
10. Surface Aspects of Hydrogen Photogeneration on Titanium Oxides	159
F. T. Wagner, S. Ferrer, and G. A. Somorjai	
11. Photocorrosion in Solar Cells: The Enhanced Effectiveness of Stabilization Agents Due to Oxide Films .....	179
S. R. Morrison, M. J. Madou, and K. W. Frese, Jr.	
12. Conditions for Rapid Photocorrosion at Strontium <b>Titanate</b> Photoanodes .....	191
R. E. Schwerzel, E. W. Brooman, H. J. Byker, E. J. Drauglis, D. D. Levy, L. E. Vaaler, and V. E. Wood	

13. Photoelectronic Properties of Ternary Niobium Oxides K. Dwight and A. Wold	207
14. Electrode Band Structure and Interface States in <b>Photoelectro-</b> chemical Cells J. G. Mavroides, J. C. Fan, and H. J. Zeiger	217
15. Photoelectrochemical Systems Involving Solid–Liquid Interfacial Layers of Chlorophylls T. Miyasaka and K. Honda	231
16. Supra-Band-Edge Reactions at Semiconductor–Electrolyte Interfaces: Band-Edge Unpinning Produced by the Effects of Inversion J. A. Turner, J. Manassen, and A. J. Nozik	253
17. Study of the Potential Distribution at the Semiconductor–Electrolyte Interface in Regenerative Photoelectrochemical Solar Cells M. Tomkiewicz, J. K. Lyden, R. P. Silberstein, and F. H. Pollak	267
18. Luminescence and Photoelectrochemistry of Surfactant Metalloporphyrin Assemblies on Solid Supports J. E. Bulkowski, R. A. Bull, and S. R. Sauerbrunn	279
19. Effects of Temperature on Excited-State Descriptions of Luminescent Photoelectrochemical Cells Employing Tellurium-Doped Cadmium Sulfide Electrodes A. B. Ellis and B. R. Karas	295
20. <b>The</b> Role of Ionic Product Desorption Rates in Photoassisted Electrochemical Reactions H. E. Hager	307
21. Carbanion Photooxidation at Semiconductor Surfaces M. A. Fox and R. C. Owen	337
22. Fundamental Aspects of Photoeffects at the n-Gallium <b>Arsenide–</b> Molten-Salt Interphase R. J. Gale, P. Smith, P. Singh, K. Rajeshwar, and J. DuBow	343
23. Analysis of Current–Voltage Characteristics of Illuminated Cadmium Selenide–Polysulfide Junctions J. Reichman and M. A. Russak	359
24. Stability of Cadmium–Chalcogenide–Based Photoelectrochemical Cells D. Cahen, G. Hodes, J. Manassen, and R. Tenne	369
25. Photoeffects on Solid-State Photoelectrochemical Cells P. G. P. Ang and A. F. Sammells	387
Index	403
