Preface

Preface to the First Edition

vii

Chapter 1 INTRODUCTION

- 1-1 Objectives of Chemical Thermodynamics
- 1-2 Limitations of Classical Thermodynamics 3

Chapter 2 MATHEMATICAL APPARATUS 6

- 2-1 Variables of Thermodynamics 7
- 2-2 Theoretical Methods 8
- 2-3 Practical Techniques 17

Chapter 3 THE FIRST LAW OF THERMODYNAMICS 33

- 3-1 Definitions 33
- 3-2 Energy: The First Law of Thermodynamics 41
- 3-3 Some Conditions under which W or Q Depends Only on Initial and Final States 43
- 3-4 Alternative Statement of the First Law of Thermodynamics 46

- 5-1 Definitions and Conventions
- 5-2 Additivity of Heats of Reaction
- 5-3 Bond Energies
- 5-4 Heat of Reaction as a Function of Temperature

Chapter 6 APPLICATION OF THE FIRST LAW TO GASES

- 6-1 Ideal Gases
- 6-2 Real Gases

Chapter 7 THE SECOND LAW OF THERMODYNAMICS

- 7-1 The Need for a Second Law 96
- 7-2 The Nature of the Second Law 97
- 7-3 The Definition of S , the Entropy of a System 100
- 7-4 The Proof that S is a Thermodynamic Property 102
- 7-5 Alternative Statement of the Second Law of Thermodynamics 116
- 7-6 Entropy Changes in Reversible Processes 117
- 7-7 Entropy Changes in Irreversible Processes 120
- 7-8 Entropy as an Index of Exhaustion 128
- 7-9 General Equations for the Entropy of Gases 131
- 7-10 Temperature Scales 133
- 7-11 Temperature-Entropy Diagram 136

Chapter 8 THE FREE-ENERGY FUNCTIONS

- 8-1 Purpose of the New Functions 142
- 8-2 Definitions 143
- 8-3 Consequences of Definitions and Derived Relations 143
- 8-4 Criteria of Nature of Chemical Change 147
- 8-5 Free Energy and the Equilibrium Constant 152
- 8-6 Useful Work and Free Energy 159

**Chapter 10 APPLICATION OF FREE ENERGY TO
CHEMICAL REACTIONS**

- 10-1** Addition of Known ΔG° 's for Suitable Chemical Equations Leading to the Desired Equation 185
- 10-2** Determination of ΔG° from Equilibrium Measurements 185
- 10-3** Determination from Measurements of Electromotive Force 189
- 10-4** Calculation from Thermal Data and the Third Law of Thermodynamics
- 10-5** Calculation from Spectroscopic Data and Statistical Mechanics

Chapter 11 THE THIRD LAW OF THERMODYNAMICS

- 11-1** Purpose of the Third Law 193
- 11-2** Formulation of the Third Law 195
- 11-3** Thermodynamic Properties at Absolute Zero 202
- 11-4** Tables of Entropies at 298°K 204

**Chapter 12 STANDARD FREE ENERGIES FROM THE
THIRD LAW** 222

- 12-1** Precise Methods 222
- 12-2** Approximate Methods 226

**THERMODYNAMICS OF SYSTEMS OF VARIABLE
COMPOSITION**

Chapter 13 PARTIAL MOLAL QUANTITIES 241

- 13-1** Need for a New Function in Dealing with Solutions 241

Chapter 14	ENTHALPY IN SYSTEMS OF VARIABLE COMPOSITION	
14-1	Definitions	271
14-2	Differential Heat of Solution	275
14-3	Integral Heat of Solution	278
14-4	Integral Heat of Dilution	280
14-5	Determination of Partial Molal Enthalpies from Calorimetric Measurements	
Chapter 15	FREE ENERGY IN SYSTEMS OF VARIABLE COMPOSITION: FUGACITY	292
15-1	Dependence of Free Energy on Composition	292
15-2	Escaping Tendency	295
15-3	The Fugacity Function	299
Chapter 16	THE FUGACITY OF GASES	305
16-1	Calculation of the Fugacity of a Real Gas	305
16-2	Joule-Thomson Effect for a van der Waals Gas	314
16-3	Solutions of Real Gases	317
Chapter 17	THE IDEAL SOLUTION	322
17-1	Definition	322
17-2	Some Consequences of the Definition	323
17-3	Thermodynamics of Transfer of Component from One Solution to Another	325
17-4	Thermodynamics of Mixing	327
17-5	Equilibrium between a Pure Solid and an Ideal Liquid Solution	329

**Chapter 19 ACTIVITY OF NONELECTROLYTES:
STANDARD STATES**

19-1	Definitions	347
19-2	Choice of Standard States	358
19-3	General Relation between Equilibrium Constant and Free Energy	358
19-4	Dependence of Activity on Pressure	359
19-5	Dependence of Activity on Temperature	360
19-6	Standard Entropy	360
19-7	Deviations from Ideality in Terms of Excess Ther-	360

**Chapter 20 DETERMINATION OF ACTIVITY OF
NONELECTROLYTES**

20-1	Measurements of Vapor Pressure	372
20-2	Distribution of Solute between Two Immiscible Solvents	372
20-3	Measurements of Electromotive Force	377
20-4	Determination of the Activity of One Component from Known Values of the Activity of the Other	377
20-5	Measurements of Freezing Points	377

**Chapter 21 ACTIVITY AND ACTIVITY COEFFICIENTS:
STRONG ELECTROLYTES**

21-1	Definitions and Standard States for Dissolved Electrolytes	386
21-2	Determination of Activities of Strong Electrolytes	397
21-3	Activity Coefficients of Some Strong Electrolytes	415

Chapter 23 CONCLUDING REMARKS

Appendix: Answers to Selected Problems

Index
