

## CONTENTS

### FUNDAMENTAL CONSTANTS AND PROPERTIES OF IONS, SALTS AND SOLVENTS

1. Values of Important Constants	1
2. Tonic Radii and Ionization Potentials	2
3. Electron Affinities of the Atoms	6
4. Work of Extraction of an Electron from Various Metals	6
5. Lattice Energies of Salts of Univalent Cations	7
6. Lattice Energies of Salts of Polyvalent Cations	7
7. Physical Properties of Water	8
8. Properties of Some Organic Solvents	9
9. Dielectric Constants of Mixtures of Water and Organic Solvents	10
10. Dielectric Constants of Methanol + Water Mixtures	11
11. Parameters for the Equation $\log_{10} \epsilon = A - Bt$	11
12. Dielectric Constants of Some Inorganic Solvents	12

### NUMERICAL VALUES OF SOME FUNCTIONS USED IN THE THEORY OF ELECTROLYTES

13. Theoretical Coefficients for Uni- valent Electrolytes in Water and Values of $RT$ in $10/F$	13
14. The Parameter for Use in Equations for Extrapolation of Apparent Molal Volumes and Apparent Molal Heat Contents	15
15. The Fuoss Extrapolation Function	17
16. The Shedlovsky Extrapolation Function	18
17. Bjerrum's Function	19
18. Extended Terms of the Debye-Huckel Theory	19

### ACTIVITY COEFFICIENTS

19. Stoichiometric Mean Molal Activity Coefficients for Aqueous Inorganic Electrolytes at $25^{\circ}\text{C}$	20
20. Stoichiometric Mean Molal Activity Coefficients for Aqueous Solutions of Salts of Organic Acids at $25^{\circ}\text{C}$	26
21. Stoichiometric Mean Molal Activity Coefficients for Concentrated Aqueous Inorganic Electrolytes at $25^{\circ}\text{C}$	28
22. The Ionic Activity Function of Water $\gamma_{\text{H}} \gamma_{\text{OH}}/a_{\text{H}_2\text{O}}$ in Salt Solutions	30
23. Values of the Constants $a$ and $a'$	30
24. Values of the Constants $a$ , $B$ and $D$	31
25. Stoichiometric Mean Molal Activity Coefficients at $25^{\circ}\text{C}$ for Solutions of Hydrochloric Acid in Non-aqueous Solvents and Aqueous-non-aqueous Mixtures	31

26. Stoichiometric Mean Molal Activity Coefficients for H <sub>2</sub> SO <sub>4</sub> in	
Non-aqueous Solvents and Aqueous-non-aqueous Mixtures at 25°C	33
27. Stoichiometric Mean Molal Activity Coefficients of Salts in Methanol	
+ Water Mixtures at 25°C	33
THE RMODYNAMIC PROPERTIES OF HCl AND NaOH	
28. Thermodynamic Properties of Hydrochloric Acid Solution in Water	34
Thermodynamic Properties of Sodium Hydroxide Solutions in Water	37
THERMAL PROPERTIES OF ELECTROLYTES	
30. Relative Partial Molal Heat Content of Solutes on Aqueous Solutions 25°C	40
31. Thermal Properties of Solvent and Solute for CeCl <sub>3</sub> and NdCl <sub>3</sub> at 25°C	41
32. Relative Partial Molal Heat Content for Cd Salt Solutions	41
33. Heat Content and Heat Capacity Data for NaCl in Aqueous Solution	
at Various Temperatures	41
35. Heat Content and Heat Capacity for Aqueous HBr at 25°C	42
36. Integral Heats of Solution of Rare Earth Chlorides at 25°C in Water	42
37. Heat Content and Heat Capacity Data for Aqueous Solutions of HF at 25°C	42
38. Constants for the Equations $L_2 = L_2(o) + at + bt^2$ and $J_2 = a + bt$	43
39. Relative Partial Molal Heat Content for H <sub>2</sub> SO <sub>4</sub> (L <sub>2</sub> ) in iso-Propanol + Water Mixtures	43
40. Constants for the Equations $L_2 = a + bt^2$ and $j_2 = 2bt$ and $L_2$ and $j_2$ at 25°C	44
41. Relative Partial Molal heat Content of Solute and Solvent in Aqueous Solutions of	
Amino Acids at 25°C	45
EQUILIBRIUM CONSTANTS IN SOLUTION	
42. Thermodynamic Acid Dissociation Constants	46
43. Dissociation Constants of Inorganic Acids in Aqueous Solution at 25°C	52
44. Ionic Product for D <sub>2</sub> O in pure D <sub>2</sub> O	53
45. Average Thermodynamic Dissociation Constants for Ion pairs at	
25°C in Aqueous Solution	54
46. Average Thermodynamic Dissociation Constants of Ion pairs in	
Aqueous-non-aqueous Mixtures and Non-aqueous Solution at 25°C	56
47. Solubility products in Aqueous Solution at 25°C	56
48. Solubility products in Non-aqueous Mixtures at 25°C	58
49. Solubility products for Silver Halides in Aqueous Solution	59
50. The Effect of Pressure upon the Equilibrium Constants of Some	
Ionic Reactions in Aqueous Solution	59
MOLAL VOLUMES OF ELECTROLYTES AND THEIR	
TEMPERATURE AND PRESSURE DEPENDENCE	
51. Apparent Molal Volumes in Aqueous Solution	60
52. Apparent Molal Expandability and Integral Coefficients of Expansion in	
Aqueous Solutions at 25°C and 1 atm	61

53. Integral Coefficient of Expansion and Apparent Molal Thermal Expandability in Aqueous Solution at 1 atm	61
54. Apparent Molal Compressibility in Aqueous Solution at 25°C	62
55. Apparent Molal Volumes in Aqueous Solution at 25°C	62
MOLTEN SALTS	
56. Conductivity of Molten Salt Mixtures	63
57. Rational Activity Coefficients for Salts in Molten Salt Mixtures	64
58. E.M.F. of Cells Containing Molten Salts	65
58. Conductance of Pure Molten Salts	65
59. Conductance of Pure Molten Salts	65
MOLTEN SALTS	
56. Conductivity of Molten Salt Mixtures	63
57. Rational Activity Coefficients for Salts in Molten Salt Mixtures	64
58. E.M.F. of Cells Containing Molten Salts	65
59. Conductance of Pure Molten Salts	65
EQUILIBRIUM PROPERTIES OF ELECTRODES	
60. Thermodynamic Functions for Ions in Aqueous Solution	66
61. Thermodynamic Functions for Ions in Liquid Ammonia	68
62. Thermodynamic Functions for Ions in Methanol + Water Mixtures	68
63. Standard Electrode Potentials (Reduction Potentials) for Inorganic Systems at 25°C	69
64. Standard Electrode Potentials (Reduction Potentials) in Non-aqueous Solutions at 25°C	73
65. Standard E.M.F. on Molality Scale for Various Cells at Various Temperatures	75
67. pH Values for Standard Solutions at 25°C	75
68. pH Values for Standard Solutions from 0°C to 60°C	75
69. Potential of Zero Charge for Various Electrode Materials in Aqueous Solutions at Room Temperature	76
VISCOSITY AND DIFFUSION IN ELECTROLYTES	
70. Viscosity of Methanolic Salt Solutions	76
71. Viscosity of Aqueous Salt Solutions	77
72. Differential Diffusion Coefficients for Dilute Aqueous Solutions for the Infinitely Dilute Aqueous Solution	79
74. Differential Self-diffusion Coefficients of Ions in Aqueous Solutions of Salts at 25°C	80
75. Integral Diffusion Coefficients for Aqueous KCl at 25°C	80
76. Conductance in Dilute Aqueous Solutions	81
CONDUCTIVITY OF ELECTROLYTES	
77. Specific Conductivity of Standard Aqueous Potassium Chloride Solution	82
78. Conductance in Dilute Non-aqueous Solutions	83
79. Limiting Ionic Mobilities in Aqueous Solutions	85
80. Limiting Ionic Mobilities in Methanol	86

81. Constants for the Equation $t^+ = B + A\sqrt{c}$	86
82. Cation Transport Numbers at 25°C in Aqueous Solution and Constants for the Limiting Equation $t^+ = t^{\circ} + A\sqrt{c}$	86
83. Cation Transport Numbers for H <sub>2</sub> SO <sub>4</sub> in Aqueous Solution	87
84. Cation Transport Numbers in Aqueous Solution	87
86. Cation Transport Numbers in Water at 25°C	88
87. Cation Transport Numbers in Anhydrous H <sub>2</sub> SO <sub>4</sub> at 25°C	88
88. Cation Transport Numbers for HCl in Water and Dioxan + Water Mixtures	89
89. Cation Transport Numbers in Anhydrous Acetic Acid at 25°C	90

#### KINETIC PROPERTIES OF ELECTRODES

90. Polarographic Half-wave Potentials of Some Cations in Various Solutions	91
91. Anodic Depolarization Potentials	93
92. Inorganic Oxidation Reduction Potentials	93
93. Polarographic Reduction Potentials	93
94. Tafel Constants and Heats of Activation for Hydrogen Evolution from Aqueous Solution	95
95. Tafel Constants and Heats of Activation for Hydrogen Evolution from Non-aqueous Solution	97
96. Parameters for the Deposition of Metals on a Substrate of the Same Metal at Room Temperature from Aqueous Solution	97
97. Parameters for the Evolution of Various Gases at Inert Electrodes in Aqueous Solution	98
98. Parameters for the Deposition of Metals from 10 <sup>-3</sup> m Aqueous Salt Solution in 1 M Supporting Solution on to Dilute Amalgam at 20°C	98
99. Parameters for Oxidation –Reduction Reactions at Electrodes in Aqueous Solution	98

#### SURFACE TENSION, DIELECTRIC CONSTANT AND REFRACTIVITY

100. Surface Tension and Apparent Relative Surface Tension of Aqueous Salt Solutions	99
101. Dielectric Constant of Aqueous Solutions at 25°C	101
APPENDIX	
103. Properties of Inorganic Compounds and Molten Salts	102
104. Electrical and Magnetic Units	111
