## Chapter

- 1 Principles of Mathematical Operation and Technique in Chemical Calculations 1
- DEFINITIVE CONCEPTS: Exponents; Significant Figures; Logs; Quadratic Equations • 1
- 2 Principles of Chemical Dimensions 16
- DEFINITIVE CONCEPTS: Components and Units of Concentration • 16
- 3 Principles of Homogeneous Phase Equilibria 33
- DEFINITIVE CONCEPTS: Ionization; Hydrolysis; Acid-Base Titration; Complex-Ion Dissociation • 33
- Calculations of Homogeneous Phase Equilibria 82
- INTERPRETATIVE EXERCISES: Ionization; Hydrolysis; Acid-Base Titration; Complex-Ion Dissociation • 82
- SUPPLEMENTARY ASSIGNMENTS: Ionization; Hydrolysis; Acid-Base Titration; Complex-Ion Dissociation • 134
- 4 Principles of Heterogeneous Phase Equilibria, I 146
- DEFINITIVE CONCEPTS: Solid-Liquid Precipitations and Solubilizations • 146
- Calculations of Heterogeneous Phase Equilibria, I 181
- INTERPRETATIVE EXERCISES: Solid-Liquid Precipitations and Solubilizations • 181
- SUPPLEMENTARY ASSIGNMENTS: Solid-Liquid Precipitations and Solubilizations • 231

*Chapter***5 Principles of Heterogeneous Phase Equilibria, II**

DEFINITIVE CONCEPTS: Liquid-Liquid Solubilizations and Extractions • 245

**Calculations of Heterogeneous Phase Equilibria, II**

INTERPRETATIVE EXERCISES: Liquid-Liquid Solubilizations and Extractions • 253

SUPPLEMENTARY ASSIGNMENTS: Liquid-Liquid Solubilizations and Extractions • 260

**6 Principles of the Activity Function**

DEFINITIVE CONCEPTS: Thermodynamic Concentrations and Constants • 263

**Calculations of the Activity Function**

INTERPRETATIVE EXERCISES: Thermodynamic Concentrations and Constants • 274

SUPPLEMENTARY ASSIGNMENTS: Thermodynamic Concentrations and Constants • 283

**7 Principles of Electrochemistry**

DEFINITIVE CONCEPTS: Cell Processes and Faraday's Laws • 287

**Calculations of Electrochemistry**

INTERPRETATIVE EXERCISES: Cell Processes and Faraday's Laws • 323

SUPPLEMENTARY ASSIGNMENTS: Cell Processes and Faraday's Laws • 332

**8 Principles of Reactant Potential and Free Energy**

DEFINITIVE CONCEPTS: Magnitudes of Electron Transfer; Redox Titration • 339

**Calculations of Reactant Potential and Free Energy**

INTERPRETATIVE EXERCISES: Magnitudes of Electron Transfer; Redox Titration • 384

SUPPLEMENTARY ASSIGNMENTS: Magnitudes of Electron Transfer; Redox Titration • 418

## Appendices

- A Answers to Odd-Numbered Supplementary Assignments
- B1 The Elements: Their Atomic Weights and Atomic Numbers; Electron Ground States and Oxidation States 435
- B2 The Elements: Their Periodic Classifications
- C Compendium of Solute Equilibria: Constants and Potentials of Reaction

INDEX

ENDPAPERS: Table of Common Logarithms Back Cover
