

CONTENTS

	PAGE
Meaning and Standardization of pH Measurements—R. G. Bates.....	1
Discussion.....	12
Performance Studies of Reference-Electrodes and Their Components at High-Tempera- tures and Pressures—J. E. Leonard.....	16
Discussion.....	31
Modern Developments in pH Instrumentation—W. R. Clark and G. A. Perley.....	34
Discussion.....	53
Problems in Measurement of pH of Blood and Other Biological Fluids—Julius Sendroy, Jr.....	55
Discussion.....	63
Quantitative Applications of pH Measurements in Analytical Chemistry—Henry Frieser.....	65
Discussion.....	71
Theoretical and Practical Problems in the Measurement of Acidity in Nonaqueous Media—Martin Kilpatrick.....	73
Discussion.....	78
Indicator Acidity Functions for Nonaqueous and Mixed Solvents—M. A. Paul and F. A. Long.....	80
Discussion.....	100
