

# Table of Contents

Major Symbols	vii
Standard Abbreviations	xvii
Introduction and Overview of Electrode Processes	I
Potentials and Thermodynamics of Cells	44
Kinetics of Electrode Reactions	86
Mass Transfer by Migration and Diffusion	119
Controlled Potential Microelectrode Techniques—Potential Step Methods	136
Controlled Potential Microelectrode Techniques—Potential Sweep Methods	213
Controlled Current Microelectrode Techniques	249
Methods Involving Forced Convection—Hydrodynamic Methods	280
Techniques Based on Concepts of Impedance	316
Bulk Electrolysis Methods	370
Electrode Reactions with Coupled Homogeneous Chemical Reactions	429
Double-Layer Structure and Adsorbed Intermediates in Electrode Processes	488
Electrochemical Instrumentation	553
Spectrometric and Photochemical Experiments	577
Appendix A Mathematical Methods	657
Appendix B Digital Simulations of Electrochemical Problems	675
Index	703
