

CONTENTS

Preface	ix
1. Overview of Electrophoresis	1
2. Electrophoresis in Polyacrylamide Gels	20
3. Immobilized pH Gradients : Recent Development	33
4. Rehydratable polyacrylamide Gels for Ultrathin-Layer Isoelectric Focusing	54
5. Silver-Stain Detection of Proteins Separated by Polyacrylamide Gel Electrophoresis	74
6. Color Silver Staining of Polypeptides in Polyacrylamide Gels	91
7. Development of Electrophoresis and Electrofocusing Standards	102
8. Standardization in Isoelectric Focusing on Ultrathin-Layer Rehydratable Polyacrylamide Gels	117
9. Application of High-Resolution, Two-Dimensional Electrophoresis to the Analysis of Wheat, Milk, and Other Agricultural Products	132
10. Applications of Isoelectric Focusing in Forensic Serology	143
11. Biophysical Characterization by Agarose Gel Electrophoresis	158
12. Pulsed Electrophoresis	167
13. Capillary Zone Electrophoresis	182
14. Capillary Isotachopheresis	199
15. Isotachopheresis of Synthetic Ion-Containing Polymers	222
16. Recent Advances in Preparative Electrophoresis	247
