PART I Physical Principles

CHAPTER 1. INTRODUCTION.....	
1. Definitions. 2. Types of Changes. 3. Relation to Photochemistry and Thermochemistry. 4. Methods of Expressing Yield. 5. Development of Radiation Chemistry.	
CHAPTER 2. ABSORPTION OF IONIZING RADIATIONS.....	10
6. Introduction. 7. Stopping of Charged Particles. 8. Heavy Charged Particles. 9. Electrons. 10. Recoil Fission Fragments. 11. Electromagnetic Radiations X- and γ -Rays. 12. Photoelectric Process. 13. Compton Scattering Process. 14. Pair Production Process. 15. Neutrons. 16. Effects of Degradation Spectrum and LET.	
CHAPTER 3. ALPHA-PARTICLES AS IONIZING AGENTS.....	26
17. Application in Gases. 18. Radium, Mesothorium. 19. Alpha-Ray Bulb. 20. Average Path of Alpha Particles from Radon in Spheres. 21. Calculation of Ionization by Radon in Small Spheres. 22. Mund's Equation for Calculating Ionization by Radon in Larger Spheres. 23. The Use of Radon in Radiation Chemistry. 24. Calculation of Ionization by Radon in Spheres by Glockler's Method. 25. Ionization by Alpha-Particles in Gas Mixtures. 25a. Construction and Use of Thin α -Ray Bulbs.	
CHAPTER 4. OTHER SOURCES AND DOSIMETRY.....	
26. Introduction. 27. Radiation from Nuclear Reactors. 28. Fission-Product Gamma-Ray Sources. 29. Gamma-Ray Sources Produced by Neutron Capture. 30. Gamma-Radiation Facilities. 31. X-Ray and Gamma-Ray Shielding. 32. Gamma-Radiation Intensities. 33. Beta Emitters. 33a. Electrical Sources of Radiation. 33b. Dosimetry.	
CHAPTER 5. KINETICS OF CHEMICAL REACTIONS INDUCED BY RADON..	
34. Types of Reaction. 35. General Kinetic Equation for the Action of Radon When Mixed With Gases in Small Volumes. 36. Application of Kinetic Equation to Experimental Results. 37. Influence of the Size of the Reaction Vessel, Law of the Inverse Square of the Diameter of the Sphere. 38. Use of Kinetics to Evaluate Yield (M/N). 39. Comparison of Absorption of	

α -Particles and Their Recoil Atoms. 40. General Properties of Recoil Atoms. 41. Chemical Reaction by Recoil Atoms. 42. Later Experiments With Alpha Recoil.

PART II: Gaseous Reactions

CHAPTER 6. REACTIONS OF ONE COMPONENT.....	
43. Oxygen-Ozone. 44. Hydrogen. 45. $H_2 + D_2 = 2HD$. 46. Ammonia. 46a. Synthesis of Ammonia. 47. Amines. 48. Hydrazine. 49. Methane. 50. Ethane and Higher Paraffins. 51. Survey of Some Saturated Hydrocarbon Reactions. 52. Characteristics of Higher Hydrocarbons. 53. C_6 Hydrocarbons. 53a. Anthracene. 54. Carbon Monoxide. 55. Carbon Dioxide. 56. Hydrogen Sulfide, Decomposition and Synthesis. 57. Hydrogen Bromide. 58. Hydrogen Iodide. Decomposition and Synthesis. 59. Methyl Iodide. 60. Chlorinated Gases. 61. Fluorinated Gases. 62. Miscellaneous.	
CHAPTER 7. OXIDATION.....	
63. Introduction. 64. Water. 65. Synthesis of Water Vapor. 66. Decomposition of Liquid Water by Alpha-Rays. 67. Water Equilibrium or Steady State. 68. Oxidation of Carbon Monoxide. 69. Oxidation of Methane. 70. Oxidation of Ethane. 71. Oxidation of Propane and Butane. 72. Addition of Methane to Carbon Dioxide. 73. Oxidation of Cyanogen. 74. Oxidation of Acetylene. 75. Exclusivity of Oxidation.	
CHAPTER 8. HYDROGENATION.....	
76. Hydrogen Activated by Ionizing Radiation. 77. Hydrogenation of Carbon Monoxide. 78. Hydrogenation of Carbon Dioxide. 79. Attempts to Hydrogenate Acetylene and Ethylene. 80. Hydrogenation of Cyanogen. 81. Hydrogenation of Chlorine. 82. Hydrogen Chloride. Synthesis and Decomposition. 83. Phosgene.	
CHAPTER 9. POLYMERIZATION.....	
84. Unsaturated One-Component Systems. 85. Unsaturated Organic Compounds. 86. Acetylene. 87. Polymerization by Beta- and X-Rays. 88. Polymerization in Pressed Disks. 89. Photopolymerization of Acetylene. 90. Polymerization of Cyanogen by Radon. 90a. The Polymerization of Hydrogen Cyanide by Radon. 91. The Polymerization (or Condensation) of Ethylene by Radon. 92. Gamma Radiolysis of Some Hydrocarbons. 93. Benzene Gas. 94. Miscellaneous Unsaturated Hydrocarbons. 95. Electron Micrographs of Radio-polymers.	

CHAPTER 10. EFFECT OF FOREIGN GASES.....	182
96. Enhancement and Inhibition. 97. Kinetic Equation for Catalysis by Gas-Ions Produced by Radon. 98. Influence of Inert Ions by Charge Transfer or by Addition to Reactants. 99. Effect of Argon with Impurities. 100. Carbon Dioxide as Inhibitor. 101. Effect of Carbon Dioxide on the Oxidation of Carbon Monoxide. 102. Effect of Carbon Dioxide on the Oxidation of Methane. 103. Effect of Inerts on Hydrogen Exchange by Charge Transfer. 104. Inhibition by Benzene of Acetylene Polymerization. 105. Depletion Effect.	
CHAPTER 11. REACTIONS INITIATED BY NUCLEAR PROCESSES.....	201
106. Introduction. 107. Neutron Bombardment. 108. The Work of J. E. Willard. 109. Organic Yields. 110. Foreign Gases in Replacement Reaction. 111. Displacement of H from Alkanes by Br ⁸⁸ , Cl ¹⁸ , I ²⁸ . 112. Rupture C-Br Bond by Br ⁸⁰ . 113. Energy of Recoil and Nature of Products. 114. Nuclear Reactions. 115. Tritiation. 116. Radiolysis of Potassium Bromate. 117. Szillard-Chalmers Reaction. 118. "Hot" Atom Chemistry. 119. Tritium Reactions. 120. Tritium Labeling.	
CHAPTER 12. MASS SPECTROMETRY.....	212
121. Introduction. 122. Appearance Potential. 123. Parent Ions. 124. Rate Constants in M.S. 125. Ion-Molecule Reactions. 126. Fragmentation and Ion-Molecule Reaction. 127. Secondary Ions in M.S. 128. Hydride Ion Transfer. 129. Cross Sections. 130. Radiation Chemistry in M.S. 131. Additivity Principle-Azides. 132. Exo- and Endothermicity in Secondary Processes. 133. Review of Transfer Reactions. 134. Rearrangement. 135. Excitation Energy of Ions. 136. Radiolysis of Formic Acid. 137. Ion-Molecule Reactions in Methyl and Ethyl Iodide. 138. Radiolysis of Acetylene in Alpha Ray M.S. 139. Ion-Radical Reactions. 139a. Negative Ions.	
CHAPTER 13. NITROGEN OXIDES—SYNTHESIS AND DECOMPOSITION..	232
140. Oxidation of Nitrogen. 141. Alpha Ray Oxidation N ₂ + O ₂ . 142. In-Pile Formation of Nitric Acid. 143. Oxidation of Nitrogen by 2 Kev Electrons. 144. Economics of In-Pile Oxidation. 145. Nitrogen Ionization and Oxidation Coincide 0 to 500 ev. 146. Fixation of Nitrogen. 147. Nitrogen Oxidation (Moist) by Electrons. 148. Kinetics of NO Oxidation. 149. Nitrous Oxide Decomposition. 150. Nitric Oxide Decomposition. 150a. Nitric Oxide and Nitrogen Dioxide.	

CONTENTS

CHAPTER 14. EFFECT OF VARIOUS PARAMETERS IN RADIATION CHEMISTRY OF GASES.....	246
151. Influence of Varying the Proportion of Reactants. 152. Action of α -Rays on Oxygen. 152a. Energy Utilization of α -Rays in Chemical Reaction. 153. Miscellaneous Influences. 154. Effect of Temperature. 155. Reactions Without Temperature Coefficient. 156. Reaction With Positive Temperature Coefficient. 157. Reactions with Negative Temperature Coefficient. 158. The Effect of Pressure. 159. The Effect of Intensity of Radiation. 160. General Discussion of the Role of Gas Ions in Radiation Chemistry. 161. Effect of Foreign Gases. 162. Influence of Wall. 163. Effect of the State of Aggregation. 164. Effect of Different Types of Radiation.	
CHAPTER 15. RADIATION CHEMISTRY IN ELECTRICAL FIELDS.....	260
165. Apparatus for Radiolysis. 166. Decomposition of Ammonia. 167. Decomposition of Nitrous Oxide. 168. Ethane. 169. Azomethane. 170. Mechanism of Decomposition of Nitrous Oxide. 171. Reaction Mechanisms.	
APPENDIX.....	269
AUTHOR INDEX.....	291
SUBJECT INDEX.....	306
