PART I

INTRODUCTION	1
CHAPTER 1. ISOTOPIC EXCHANGE REACTIONS	6
1.1 Exchange Laws for Homogeneous Stable Systems	7
(a) Exponential Exchange Law for Simple Reactions	7
(b) Exchange Laws for Special Complex Reactions	11
1.2 Separation-Induced Exchange and Incomplete Separation	16
1.3 Possible Mechanisms for Homogeneous-Exchange Reactions	20
(a) Dissociation	20
(b) Electron Transfer	21
(c) Atom Transfer	27
1.4 Heterogeneous-Exchange Reactions	34
CHAPTER 2. RADIOACTIVITY APPLIED TO CHEMICAL KINETICS	44
2.1 Reaction Rates at Equilibrium	45
2.2 Tracing Tagged Atoms in a Reaction	46
2.3 Test of Reversibility	50
CHAPTER 3. RADIOACTIVITY APPLIED TO STRUCTURAL CHEMISTRY	54
3.1 Relation of Molecular Structure to Isotopic Exchange	54
3.2 Equivalence of Atoms in a Molecule	58
(a) Synthesis-Decomposition Test of Equivalence	58
(b) Isotopic-Exchange-Rate Test of Equivalence	60
CHAPTER 4. RADIOACTIVITY APPLIED TO SELF-DIFFUSION STUDIES	62
4.1 Self-diffusion in Solids	65
(a) Tracer Concentration versus Diffusion Time	66
(b) Tracer Concentration versus Diffusion Coordinate	71
4.2 Self-diffusion in Liquids	75
4.3 Self-diffusion in Gases	77
4.4 The Role of Self-diffusion in Heterogeneous Reactions	78
4.5 Remarks on the Theoretical Interpretations of Self-diffusion Processes	79
CHAPTER 5. RADIOACTIVITY APPLIED TO ANALYTICAL CHEMISTRY	82
5.1 Analysis by Natural Radioactivity	83
5.2 Analysis by Induced Radioactivity (Activation Analysis)	88

CHAPTER 6. BEHAVIOR OF CARRIER-FREE TRACERS

- 6-1 Coprecipitation
 - (a) Coprecipitation via Isomorphous Replacement
 - (b) Coprecipitation via Adsorption
 - (c) Coprecipitation via Anomalous-Mixed-Crystal Formation
 - (d) Coprecipitation via "Internal Adsorption"
- 6-2 Deposition on Preformed, Non-metallic Solids
 - (a) Deposition on Ionic Precipitates
 - (b) Deposition on Charcoal
 - (c) Deposition on Ion-Exchange Resins
- 6-3 Radiocolloid Formation
 - (a) Detection of Radiocolloids
 - (b) Factors Affecting the Formation of Radiocolloids
- 6-4 Solvent Extraction
- 6-5 Vaporization
 - (a) Evaporation from Solid Surfaces
 - (b) Evaporation from Solution
- 6-6 Oxidation-Reduction
 - (a) Electrolytic Deposition
 - (b) Reduction by Metals
 - (c) Oxidation-Reduction in Homogeneous Media
- 6-7 Diffusion and Electrical Migration
- 6-8 Extrapolation from Tracer to Macro Behavior

CHAPTER 7. RADIOACTIVITY APPLIED TO THE DISCOVERY AND INVESTIGATION OF THE NEWER ELEMENTS

- 7-1 Nuclear Stability Considerations Regarding the Existence of Elements 43 and 61 in Nature
 - 7-2 Technetium
 - 7-3 Promethium
 - 7-4 Polonium
 - 7-5 Astatine
 - 7-6 Radon
 - 7-7 Francium
 - 7-8 Radium
 - 7-9 Actinium
 - 7-10 Protactinium
 - 7-11 Neptunium
 - 7-12 Plutonium
 - 7-13 Americium
 - 7-14 Curium
 - 7-15 Berkelium (Element 97)
 - 7-16 Californium (Element 98)
- 

(b)	The Actinide Hypothesis	236
(c)	Transcalifornium Elements ($Z > 98$)	242
CHAPTER 8.	CHEMICAL PHENOMENA ACCOMPANYING NUCLEAR REACTIONS (HOT-ATOM CHEMISTRY)	244
8.1	Chemistry of Atoms Formed by Induced Nuclear Reactions—Product Isotopic with the Target	245
(a)	Energetics of Recoil after Gamma Emission	245
(b)	Organic Halide Targets— n, γ Reactions	247
(c)	Inorganic Targets— n, γ Reactions	258
(d)	Szillard-Chalmers Techniques	260
8.2	Chemistry of Atoms Formed by Induced Nuclear Reactions—Product Non-isotopic with the Target	263
(a)	Energetics of Recoil after Heavy Particle Capture and Emis- sion	263
(b)	Experimental— n, p Reactions	264
8.3	Chemistry of Atoms Formed by Isomeric Transitions	268
(a)	Energetics of Excitation after Isomeric Transition	268
(b)	Experimental—Isomeric Transitions	269
8.4	Chemistry of Atoms Formed by Alpha Decay	273
8.5	Chemistry of Atoms Formed by Beta Decay	274
8.6	Radiation Chemistry	278
CHAPTER 9.	EMANATION METHODS	284
9.1	Theory of the Emanation Process	285
(a)	Emanating Power of a Single Grain	285
(b)	Effect of Aggregates of Grains on the Emanating Power	288
9.2	Experimental Determination of Emanating Power	291
(a)	Preparation of Emanating Sources	293
(b)	Measurement of Emanating Power	295
9.3	Applications of Emanating Power Determinations	298
(a)	Aging of Precipitates	298
(b)	Crystal-Structure Changes and Decomposition Reactions	299
(c)	Reaction between Solids	302
(d)	Surface Determinations—Resolution of E_R and E_D	304
9.4	Specific Gravity Determination for Porous Substances	309
CHAPTER 10.	RADIOACTIVITY APPLIED TO SURFACE DETERMINATIONS	311
10.1	Surface-Exchange Method	311
10.2	Emanation Method	316
10.3	Comparison of Methods	317
