	PREFACE	<i>v</i>
	LIST OF TABLES	<i>xv</i>
	BIBLIOGRAPHICAL NOTE	<i>xvi</i>
		<i>"</i>
SECTION I	CHAPTER 1. CHEMICAL EQUILIBRIUM	<i>1</i>
Fundamental Principles	State Properties	<i>3</i>
	A Criterion for Equilibrium	<i>4</i>
	Gibbs Free Energy	<i>5</i>
	The Chemical Potential	<i>7</i>
	On Getting to Equilibrium	<i>7</i>
	Activities and the Equilibrium Constant	<i>9</i>
	Standard States	<i>11</i>
	Activity Coefficients	<i>11</i>
	Background Bibliography	<i>12</i>
	Intensive-Study Readings	<i>12</i>
	CHAPTER 2. THE SOLUBILITY PRODUCT	<i>13</i>
	Establishment of Solubility Equilibrium	<i>14</i>
	Apparent Equilibrium Constants	<i>16</i>
	Ionic Strength	<i>16</i>
	Precipitation Titrations	<i>18</i>

Experimental Precipitation Titration Curve	
Endpoint Detection	27
Problems	27
Bibliographical Note	

CHAPTER 3. ACID-BASE EQUILIBRIA

Dissociation Constants	
Hydrochloric Acid	
Acetic Acid	
Sodium Hydroxide	
Ammonia	
Logarithmic pH and pK Scales	
Hydrogen-Ion Concentration and pH	
Reconsideration of NaOH and HCl	
Interionic Attraction School	
Structure School	
Complex-Formation School	
A Look Ahead	
Problems	
Suggestions for Experimental Investigation	
Bibliographical Note	

CHAPTER 4. TITRATION OF A MONOPROTIC ACID

Titration Curves	
High- pH Approximation	
Low- pH Approximation	
Equivalence Point	
Distribution Fractions	
Special Case of Strong Acids	
Determination of K_{HA}' from Titration Data	
Buffer Effect	
Buffer Index	
Detection of the Equivalence Point	
Water as a Leveling Solvent	
Problems	
Suggestion for Experimental Investigation	

CHAPTER 5. DIPROTIC ACIDS

Calculation of a Titration Curve	
The High- pH Approximation	

Distribution Functions	89
Macroscopic and Microscopic	
Equilibrium Constants	91
The Principle of Microscopic Reversibility	93
On Seeing Two Endpoints	94
Titration Curve When All Microscopic	
Equilibrium Constants are Equal	99
Amino Acids	100
Isoelectric and Isoionic Solutions	102
Determination of Equilibrium Constants	
from Titration Data	104
When n is Large	105
Problems	106
Suggestions for Further Study	106
CHAPTER 6. ACID-BASE TITRATIONS	
IN NON-AQUEOUS SOLVENTS	108
Titration in Glacial Acetic Acid	110
If $K_{\text{CH}_3\text{-COOH}'}$ Were Zero	113
Problems	114
Suggestions for Experimental	
Investigations	115
Bibliographical Note	115
CHAPTER 7. COMPLEX-ION EQUILIBRIA	117
Multiple-Ligand Complexes	120
Distribution of Species	123
Microscopic Equilibrium Constants and the	
Statistical Factor	124
Bjerrum Formation Function	126
Spectrophotometric Determination of K_1'	
When $n = 1$	129
Spectrophotometric Determination of	
K_1' and K_2'	
When $n = 2$	131
Problems	132
Suggestion for Further Study	132
Bibliographical Note	133
CHAPTER 8. OXIDATION-REDUCTION	
EQUILIBRIA	134
Oxidation-Reduction Titrations	135
Redox Quotient	136

	Redox Indicators	137
	Electrochemical Cells	138
	Potentiometric Titration Curve	141
	Problems	142
	Suggestion for Experimental Investigation	142
	Bibliographical Note	143
SECTION II	CHAPTER 9. ACID-BASE TITRATION OF A POLYPROTIC ACID	145
Some Case Studies in Multiple Equilibria	Experimental Evaluation of \bar{v}	145
	Equilibrium Constants and \bar{v}	148
	Experimental Titration Curves	152
	Problems	152
	Suggestions for Further Study	153
	CHAPTER 10. THE SOLUBILITY OF LEAD CHLORIDE	154
	A Chemical Model Without Complex Formation	154
	Formation of the Complex PbCl^+	155
	Two Complexes: PbCl^+ and PbCl_2	156
	Higher Chloride Complexes	157
	Suggestion for Further Study	158
	Suggestion for Experimental Investigation	158
	CHAPTER 11. EQUILIBRIA IN THE ALANINE-NICKEL(II) SYSTEM	159
	Homogeneous Case	160
	Acid-Base Titration of Alanine	164
	Nickel(II)-Alanine Titration	168
	Heterogeneous Equilibria	170
	Problems	171
	Suggestions for Experimental Investigations	172
	CHAPTER 12. COMPLEXATION EQUILIBRIA IN SILVER CHLORIDE PRECIPITATION TITRATIONS	173
	Modified Volhard Titration	173
	Before AgSCN Precipitates	174
	In the Presence of AgSCN Precipitate	175
	Some Notes on the Computations	177
	Discussion of the Titration	170

Effect of Chloride Complexes on the Silver Chloride Titration Curve	179
Problems	181
Suggestions for Experimental Investigations	181
CHAPTER 13. EDTA TITRATIONS	182
Conditional Equilibrium Constants	182
EDTA as a Polyprotic Acid	185
Problems	187
Suggestion for Experimental Investigation	188
Bibliographical Note	188
APPENDIX I. ANNOTATED COMPILATION OF SELECTED EQUILIBRIUM CONSTANTS	189
APPENDIX II. COMMON LOGARITHMS OF NUMBERS	195
INDEX	215
