

Contents

CHAPTER	<i>Chemical Reactivity and Reaction Paths. General Introduction</i>	
	G. Klopman	
CHAPTER 2	<i>Empirical and Semiempirical Calculations of Chemical Reactivity and Reaction Paths</i>	13
	M. Simonetta	
CHAPTER 3	<i>Intermolecular Interactions and Chemical Reactivity</i>	23
	H. Fujimoto and K. Fukui	
CHAPTER 4	<i>The Generalized Perturbation Theory of Chemical Reactivity and Its Applications</i>	55
	G. Klopman	
CHAPTER 5	<i>Nucleophilic Reactivity</i>	167
	R. F. Hudson	
CHAPTER 6	<i>Electrophilic Reactions: The General Concept of Carbo- cations and Their Role in Electrophilic Reactions of Alkanes (σ Bases)</i>	253
	G. A. Olah	
CHAPTER 7	<i>Cycloaddition Reactions: A Simple Theoretical Approach</i>	275
	W. C. Herndon, J. Feuer, W. B. Giles, D. Otteson, and E. Silber	
CHAPTER 8	<i>Photochemical Reactions. Correlation Diagrams and Energy Barriers</i>	301
	J. Michl	
CHAPTER 9	<i>Ionic Reactions in the Gas Phase: Study by Ion Cyclotron Resonance</i>	339
	R. C. Dunbar	
	<i>Index</i>	367
