

CONTENTS

Preface	xi
MULTIPLE SURFACE TECHNIQUES ON COMPLEX CATALYST SYSTEMS	
1. Arsenic Poisoning of Hydrodesulfurization Catalysts	2
Ruth N. Merryfield, Lloyd E. Gardner, and George D. Parks	
2. A Pilot Plant Reactor-Surface Analysis System for Catalyst Studies	15
T. H. Fleisch	
3. Correlation Between Spectroscopic Measurements and Catalytic Behavior of Selective Oxidation Catalysts	26
J. F. Brazdil, M. Mehicic, L. C. Glaeser, M. A. S. Hazle, and R. K. Grasselli	
4. Application of Surface Analysis Techniques in the Study of Catalyst Systems	37
D. D. Hawn, R. C. Cieslinski, and H. E. Klassen	
5. Valence State of Rhenium in Reduced Bimetallic Catalysts With and Without Alkali Metals	57
Sayra R. Adkins and Burtron H. Davis	
6. Frequency Response Chemisorption Studies of Carbon Monoxide Hydrogenation Catalysts	67
J. G. Goodwin, Jr., J. E. Lester, G. Marcelin, and S. F. Mitchell	
MULTIPLE SURFACE TECHNIQUES ON MODEL CATALYST SYSTEMS	
7. Spectroscopy of Metal-Titanium Dioxide Systems	80
Y.-M. Sun, D. N. Belton, and J. M. White	
8. Isotopic Tracers in Catalysis: Aromatics from <i>n</i>-Paraffins over Te-NaX Zeolite	88
Joe W. Hightower and Geoffrey L. Price	
9. Titanium Dioxide Single-Crystal and Powder Surfaces in the Presence and Absence of Platinum: An Auger Electron Spectroscopic and Electron-Stimulated Desorption Study	98
M. A. Vannice, P. Odier, M. Bujor, and J. J. Fripiat	
10. Clusters: Molecular Surfaces	111
A. Kaldor, D. M. Cox, D. J. Trevor, and R. L. Whetten	
11. Iron Fischer-Tropsch Catalysts: Surface Synthesis at High Pressure	124
D. J. Dwyer	
12. Low-Energy Ion-Scattering Spectroscopy: Applications to Catalysts	133
James C. Carver, S. Mark Davis, and Duane A. Goetsch	
13. X-ray Photoelectron and X-ray Absorption Spectroscopic Characterization of Cobalt Catalysts: Reduction and Sulfidation Behavior	144
D. G. Castner and P. R. Watson	

CATALYTIC MECHANISMS ON WELL-DEFINED
SURFACES

14.	Studies of the Kinetics and Mechanisms of Ammonia Synthesis and Hydrodesulfurization on Metal Single-Crystal Surfaces	154
	A. J. Gellman, M. Asscher, and G. A. Somorjai	
15.	Oxygen Interactions and Reactions on Palladium(100): Coadsorption Studies with C₂H₄, H₂O, and CH₃OH	165
	E. M. Stuve, S. W. Jorgensen, and R. J. Madix	
16.	Surface Reactions on Clean Platinum and Rhodium at Low and High Pressures	177
	L. D. Schmidt, D. Hasenberg, S. Schwartz, and G. A. Papapolymerou	
17.	Hydrocarbon Synthesis and Rearrangement over Clean and Chemically Modified Surfaces	185
	C. H. F. Peden and D. W. Goodman	
18.	Molecular Adsorption and Decomposition on Clean and Sulfur-Modified Metal Surfaces	199
	R. J. Koestner, E. B. Kollin, J. Stöhr, and J. L. Gland	
19.	Selective Epoxidation of Ethylene Catalyzed by Silver: Mechanistic Details Revealed by Single-Crystal Studies	210
	Charles T. Campbell	
20.	Surface Structure and Reaction Dynamics in Catalysis	222
	K. Christmann and G. Ertl	
21.	Laser-Induced Thermal Desorption with Fourier Transform Mass Spectrometric Detection	238
	M. G. Sherman, J. R. Kingsley, R. T. McIver, Jr., and J. C. Hemminger	

CHARACTERIZATION OF BIMETALLIC CATALYSTS

22.	Structure of Bimetallic Catalysts: Application of Extended X-ray Absorption Fine Structure Studies	253
	J. H. Sinfelt, G. H. Via, G. Meitzner, and F. W. Lytle	
23.	Surface Chemistry and Catalysis on Some Platinum-Bimetallic Catalysts	267
	V. Ponec	
24.	Determination of the Atomic and Electronic Structure of Platinum Catalysts by X-ray Absorption Spectroscopy	280
	F. W. Lytle, R. B. Gregor, E. C. Marques, V. A. Biebesheimer, D. R. Sandstrom, J. A. Horsley, G. H. Via, and J. H. Sinfelt	
25.	The Effect of Support-Metal Precursor Interactions on the Surface Composition of Supported Bimetallic Clusters	294
	H. Miura, S. S. Feng, R. Saymeh, and R. D. Gonzalez	
26.	Surface Characterization and Methanation Activity of Catalysts Derived from Binary and Ternary Intermetallics	305
	M. Houalla, T. A. Dang, E. L. Eddy, C. L. Kibby, L. Petrakis, and D. M. Hercules	
27.	Secondary Ion Mass Spectroscopic Studies of Adsorption and Reaction at Metal Surfaces: Correlations with Other Surface-Sensitive Techniques ...	317
	C. R. Brundle, R. J. Behm, P. Alnot, J. Grimblot, G. Polzonetti, H. Hopster, and K. Wandelt	

NEW PERSPECTIVES IN CATALYSIS VIA ELECTRON
MICROSCOPY AND X-RAY SCATTERING

28. Electron Microscopy and Diffraction Techniques for the Study of Small Particles	329
J. M. Cowley	
29. Atomic Imaging of Particle Surfaces	341
L. D. Marks and David J. Smith	
30. Microanalysis of a Copper-Zinc Oxide Methanol Synthesis Catalyst Precursor	351
P. B. Himelfarb, G. W. Simmons, K. Klier, and M. José-Yacamán	
31. Characterization of Catalysts by Analytical Electron Microscopy	361
C. E. Lyman	
32. Multitechnique Characterization of Supported Metals	374
William Targos	
33. Diffraction from Supported Metal Catalysts	385
J. B. Cohen, P. Georgopoulos, J. B. Butt, and R. L. Burwell, Jr.	

VIBRATIONAL CHARACTERIZATION
OF CATALYTIC REACTIONS

34. Vibrational Analysis of Adsorbed Molecules	392
H. Ibach and J. E. Müller	
35. IR Spectroscopic Characterization of Adsorbed Species and Processes on Surfaces	404
John T. Yates, Jr., Patrick Gelin, and Thomas Beebe	
36. Computerized IR Studies of Cobalt-Molybdenum-Aluminum Oxide Hydrodesulfurization Catalysts	422
J. B. Peri	
37. Fourier Transform IR Studies of Surface Adsorbates and Surface-Mediated Reactions	435
David D. Saperstein and William G. Golden	
38. IR Photoacoustic Spectroscopy of Silica and Aluminum Oxide	449
J. B. Benziger, S. J. McGovern, and B. S. H. Royce	
39. Carbon Monoxide Oxidation on Platinum: Coverage Dependence of the Product Internal Energy	464
D. A. Mantell, K. Kunimori, S. B. Ryali, and Gary L. Haller	

MAGNETIC METHODS IN CATALYST RESEARCH

40. The Role of Intercalates in Heterogeneous Catalysis	472
William Jones, John M. Thomas, D. Tilak B. Tennakoon, Robert Schlogl, and Paul Diddams	
41. Dynamics of Benzene in X-Type Zeolites	485
Dennis L. Hasha, Virginia W. Miner, Juan M. Garcés, and Stephen C. Locke	
42. Magnetic and Mössbauer Characterization of Iron-Zeolite and Iron and/or Ruthenium on Doped-Carbon Catalysts	498
L. N. Mulay and Thomas Pannaparayil	
43. Characterization of Supported Iron Oxide Particles Using Mössbauer Spectroscopy and Magnetic Susceptibility	518
J. Phillips, Y. Chen, and J. A. Dumesic	

NEW TECHNIQUES IN ELECTROCATALYSIS

44. In Situ Spectroscopic Studies of Oxygen Electrocatalysts Involving Transition Metal Macrocycles.....	535
Ernest Yeager, Daniel A. Scherson, and Cristian A. Fierro	
45. IR Spectroscopy as an In Situ Probe for Molecular Structure in Electrocatalytic and Related Reactions.....	550
Alan Bewick and Maher Kalaji	
46. Surface Spectroscopy of Platinum-Cadmium Sulfide-Perfluorosulfonate Polymer Systems.....	566
N. Kakuta, J. M. White, A. Campion, A. J. Bard, M. A. Fox, S. E. Webber, and M. Finlayson	
47. New Catalysts and New Electrolytes for Acid Fuel Cells.....	575
P. N. Ross and A. J. Appleby	
48. Carbonaceous Surfaces: Modification, Characterization, and Uses for Electrocatalysis.....	582
Dale H. Karweik, Ing-Feng Hu, Sue Weng, and Theodore Kuwana	

INDEXES

Author Index.....	597
Subject Index.....	598
