CHAPTER	Page
1. THE PARAHYDROGEN AND ORTHODEUTERIUM CONVERSIONS AND THE HYDROGEN-DEUTERIUM EXCHANGE, <i>B. M. W. Trapnell</i> . . . . .	1
Introduction . . . . .	1
Homogeneous Catalysis of Conversion and Exchange . . . . .	2
Heterogeneous Catalysis of Conversion and Exchange . . . . .	7
Use of the Conversion in Catalytic Problems . . . . .	36
2. THE CATALYTIC HYDROGENATION OF ETHYLENE, <i>D. D. Eley</i> . . . . .	49
The Equilibrium . . . . .	49
The Kinetics of Hydrogenation . . . . .	50
Ethylene on Nickel . . . . .	51
Ethylene on Other Metals . . . . .	52
Deuteration . . . . .	53
Stereochemistry of Hydrogenation . . . . .	53
Related Substrates . . . . .	54
Summary of Above Results . . . . .	54
Adsorbed Films . . . . .	55
Preadsorbed Ethylene and Gaseous Hydrogen . . . . .	57
Reaction of Olefin with Chemisorbed Hydrogen . . . . .	58
The Theory of the Adsorbed Film . . . . .	58
The Parahydrogen Conversion . . . . .	60
Effect of Olefin on the Parahydrogen Conversion . . . . .	63
Related Reactions . . . . .	63
Quantitative Theories . . . . .	67
The Half-Hydrogenated State . . . . .	68
The Energy Balance . . . . .	72
Summary . . . . .	73
3. CATALYTIC HYDROGENATION OF OLEFINIC HYDROCARBONS, <i>B. B. Corson</i> . . . . .	79
Selective Hydrogenation of Olefins . . . . .	79
Reduction of Olefinic Hydrocarbons by Calcium-Ammonia and Alkali Metals . . . . .	93
Hydrogenation of Olefins by Hydrogen Transfer . . . . .	96
Stereochemistry of Hydrogenation of Olefins . . . . .	97
Generalities Concerning the Catalytic Hydrogenation of Hydrocarbons . . . . .	98

4. THE ADDITION OF HYDROGEN TO CARBON-CARBON TRIPLE BONDS, <i>G. C. Bond</i> .....	109
Introduction.....	109
The Gas Phase Hydrogenation of Acetylenic Bonds....	114
The Liquid Phase Hydrogenation of Acetylenic Bonds..	142
Summary and Discussion.....	145
5. THE CATALYTIC HYDROGENATION OF NITRO COMPOUNDS, <i>Hil- ton A. Smith and William C. Bedoit, Jr.</i> .....	149
Introduction.....	149
Aliphatic Nitro Compounds.....	149
Partial Reduction of Aliphatic Nitro Compounds.....	150
Nitroketones.....	152
Nitrovinyl Polymer.....	153
Unconjugated Nitroolefins.....	153
$\alpha, \beta$ -Unsaturated Nitroolefins.....	153
Aromatic Nitro Compounds.....	155
Kinetics of Hydrogenation of Nitro-Compounds.....	157
Aliphatic Nitro Compounds with Platinum Catalyst...	163
The Nitroolefins with Platinum Catalyst.....	165
Aromatic Nitro Compounds over Nickel Catalyst.....	166
Hydrogenation of Nitroolefins over Nickel Catalyst...	168
6. THE CATALYTIC SYNTHESIS OF AMMONIA FROM NITROGEN AND HYDROGEN, <i>W. G. Frankenburg</i> .....	171
The First Steps Toward a Catalytic Ammonia Synthesis	171
The Industrial Synthesis Process.....	174
The Theory of the Catalytic Ammonia Synthesis.....	185
7. RESEARCH ON AMMONIA SYNTHESIS SINCE 1940, <i>C. Bokhoven, C. van Heerden, R. Westrik and P. Zwietering</i> .....	265
Introduction.....	265
Structure and Texture of the Catalyst.....	268
Chemisorption in Ammonia Synthesis.....	286
Kinetics of Ammonia Synthesis.....	317
Conclusion.....	343
8. SYNTHESIS OF METHANOL, <i>G. Natta</i> .....	349
Introduction.....	349
Thermodynamic Considerations.....	351
Catalysis in the Synthesis of Methanol.....	353
Antiselectivity Agents and Poisons.....	378
Rate of Reaction.....	382
9. HYDROGENATION OF GLYCERIDE OILS, <i>R. O. Feuge</i> .....	413
Introduction.....	413
Types of Catalysts and Methods of Preparation.....	414
Catalysts of Nickel.....	414
Catalysts Other Than Nickel.....	424

Behavior of the Components of an Oil During Hydrogenation.....	431
Other Factors in Hydrogenation.....	442
10. CATALYTIC DEHYDROGENATION, <i>K. K. Kearby</i> .....	453 <sup>A96</sup>
Equilibrium Considerations in Paraffin Dehydrogenation.....	454
Experimental Investigations of Paraffin Dehydrogenation Catalysts.....	458
Effect of Feed Diluents on Dehydrogenation.....	462
Commercial Dehydrogenation Processes.....	464
Dehydrogenation of Olefins and Alkyl-Aryl Hydrocarbons.....	466
Author Index.....	493
Subject Index.....	501
