

# Contents

## **1 Importance**

Present Status and Outlook, 1

2. Academic and Industrial Problems. 6

## **2. Characteristic Features**

Homogeneity, 9

2. Specificity and Selectivity, 1

## **3. Basic Principles**

1. Chemical Kinetics and Energetic Aspects, 14

1.1. Zeroth-Order Reactions, 14

1.2. First-Order Reactions, 15

1.3. Pseudo-First-Order Reactions, 16

1.4. Complex Reactions, 16

1.5. The Michaelis-Menten Rate Equation, 18

1.6. Rate Dependence on Catalyst Concentration, 20

1.7. The Rate-Determining Step, 20

1.8. Activation Parameters, 22

2. Homogeneous Active Sites: Activation and Deactivation, 24

3. Fundamental Aspects of Selectivity, 25

4. Stereochemistry, Orbital Symmetry, and Reactivity. 32

## **4. Elementary Processes**

1. General Interactions, 45

1.1. Electrophilic and Nucleophilic Interactions, 45

- 1.2. Electron Donor-Acceptor Interactions, 52
- 1.3. Radical Interactions, 56
2. Elementary Reactions in Transition Metal Chemistry, 60
  - 2.1. Coordination and Dissociation of Ligands, 60
  - 2.2. Oxidative Addition and Reductive Elimination, 64
  - 2.3. Insertion and De-insertion, 75
  - 2.4. Cycloadditions and Electrocyclic Reactions, 81
  - 2.5. Fluxionality and Polytopal Rearrangements, 88
  - 2.6. Reactions of Coordinated Ligands, 92
  - 2.7.  $\sigma$ - $\pi$  Rearrangements, 97
5. Mechanisms
  1. Hydrolysis and Condensation, 109
  2. Polar Addition and Ionic Elimination, 115
  3. Electron Transfer Redox Reactions, 119
  4. Group Transfer Reactions, 122
  5. Methyl Transfer Reactions, 122
  6. Isomerizations, 123
  7. Hydrogenations, 125
  8. Carbonylations, 130
  9. Oligomerizations, 133
  10. Polymerizations, 139
  11. Oxidations, 145
  12. Carbenoid Reactions, 150
  13. Nitrogen Fixations, 154
  14. Enantioselective Catalytic Reactions, 159
6. Further Developments
  1. Heterogenized Homogeneous Catalysts, 173
  2. Enzyme-like Catalysts, 176
  3. Extremely Selective Catalysts, 179

- 4. Energy Problems, 181
- 5. Phase-Transfer Catalysts, 182

**7. Industrial Applications**

- 1. Petrochemicals, 187
- 2. Coal, 190
- 3. Fine Chemicals, 192

**Index 197**
