Preface

A. General Section

1. Historical review of the development and application of sulphide catalysts	11
2. The significance, technical application and specific position of sulphide catalysts	15
2.1. The significance of sulphide catalysts in chemical technology	15
2.2. General survey of the properties of sulphide catalysts	18
3. Preparation and regeneration of sulphide catalysts	23
3.1. Preparation of sulphide catalysts	23
3.1.1. Preparation of catalysts by the action of H ₂ S on suitable starting substances	23
3.1.2. Preparation of sulphide catalysts by decomposition of thiosalts	26
3.1.3. Principles of preparing mixed and supported sulphide catalysts	28
3.1.4. Special methods of preparation of sulphide catalysts	32
3.2. Carriers for sulphide catalysts	32
3.3. Regeneration of sulphide catalysts	34
4. Physico-chemical properties of sulphide catalysts	37
4.1. The crystal structure of sulphide catalysts	37
4.2. The behaviour of sulphide catalysts at elevated temperatures and some thermodynamic properties of sulphides	42
4.3. Texture and absorption properties of sulphide catalysts	50
4.4. Electrical properties of sulphide catalysts	61
4.5. Magnetic properties of sulphide catalysts	68
4.6. Optical properties of sulphide catalysts	72
5. The activity and selectivity of sulphide catalysts and methods of influencing these properties	74
5.1. The influence of non-stoichiometric sulphur, sulphur compounds and methods of sulphurisation on the activity of sulphide catalysts	74
5.2. The influence of promoters	91

5.3. The influence of the carrier and acidity of the catalyst surface on the activity of sulphide catalysts	101
5.4. Deactivation of sulphide catalysts	104
5.4.1. The influence of nitrogen- and oxygen-containing substances and of some hydrocarbons	105
5.4.2. The deactivating effect of carbonaceous deposits and ashes	109

B. Special Section

6. Hydrogenation, synthesis and some reactions of individual organic compounds in the presence of sulphide catalysts	118
6.1. Hydrogenation of unsaturated hydrocarbons	118
6.1.1. Hydrogenation of monoolefins	118
6.1.2. Hydrogenation of polyolefins	121
6.1.3. Hydrogenation of acetylenes	123
6.2. Hydrogenation of aromatic hydrocarbons	124
6.2.1. Kinetics and chemistry of hydrogenation of aromatic hydrocarbons in the presence of sulphide catalysts	125
6.2.2. Hydrogenation of non-condensed aromatic hydrocarbons	131
6.2.3. Hydrogenation of condensed aromatic hydrocarbons	132
6.3. Hydrocracking, dehydroalkylation and cracking of hydrocarbons	134
6.3.1. Hydrocracking of hydrocarbons	134
6.3.2. Cracking of hydrocarbons	147
6.4. Hydrogenation of alcohols and ethers	150
6.4.1. Hydrogenation of alcohols	150
6.4.2. Hydrogenation of ethers	156
6.5. Hydrogenation of phenols	156
6.5.1. The mechanism of hydrogenation of phenols	157
6.5.2. Hydrogenation of phenolic ethers	161
6.5.3. Hydrogenation and hydrodealkylation of higher phenols	162
6.5.4. Hydrogenation of polyhydric phenols	165
6.6. Hydrogenation of carbonyl compounds	167
6.6.1. Total hydrogenation of the carbonyl group to methyl or methylene group	168
6.6.2. Hydrogenation of carbonyl compounds to alcohols	171
6.7. Hydrogenation of acids, their esters and anhydrides	173
6.8. Hydrogenation of oxygen-containing heterocyclic compounds	176
6.9. Hydrogenation of sulphur compounds	179
6.9.1. Chemistry and thermodynamics of hydrogenation of sulphur compounds	179
6.9.2. Review of hydrogenation reactions of sulphur compounds in the presence of sulphide catalysts	182
6.9.2.1. Hydrogenation of simple sulphur compounds	182
6.9.2.2. Hydrogenation of sulphur compounds containing oxygen or nitrogen	187
6.9.3. Mechanism and kinetics of hydrogenation of sulphur compounds	201
6.9.3.1. Hydrogenation of carbon disulphide and carbonyl sulphide	201
6.9.3.2. Hydrogenation of mercaptans, sulphides and polysulphides	203
6.9.3.3. Hydrogenation of sulphur-containing heterocyclic compounds	210
6.9.3.4. Hydrogenation kinetics of sulphur compounds	226
6.9.3.5. Hydrodesulphurisation kinetics of hydrocarbon mixtures	236

✓ 6.10. Hydrogenation of nitrogen-containing compounds	244
6.10.1. Hydrogenation of amines	245
6.10.2. Hydrogenation of nitro compounds	246
6.10.3. Hydrogenation of nitriles	248
6.10.4. Hydrogenation of nitrogen-containing heterocyclic compounds	248
6.10.4.1. The chemistry of hydrogenation of nitrogen heterocycles	249
6.10.4.1.1. Hydrogenation of five-membered heterocycles	249
6.10.4.1.2. Hydrogenation of six-membered heterocycles	252
6.10.4.2. Hydrogenolysis kinetics of nitrogen compounds	256
6.11. Synthesis and reactions of organic compounds in the presence of sulphide catalysts	260
6.11.1. Synthesis of sulphur compounds in the presence of sulphide catalysts	260
6.11.1.1. Synthesis of carbon disulphide	260
6.11.1.2. Synthesis of sulphur compounds involving addition	261
6.11.1.3. Thiolation of organic compounds catalysed by metal sulphides	268
6.11.1.3.1. Thiolation of alcohols, phenols and ethers	268
6.11.1.3.2. Reductive thiolation	275
6.11.1.4. Preparation of mercaptans by hydrogenolysis of sulphides and polysulphides	278
6.11.1.5. Some other reactions of organic sulphur compounds catalysed by metal sulphides	279
6.11.2. Synthesis of nitrogen compounds	280
6.11.3. Metal sulphides used as catalysts in dehydration, hydration, halogenation, dehalogenation and some other reactions	282
7. Use of sulphide catalysts in processing raw materials in the fuel industry	285
7.1. Hydrogenation of coal and related materials	285
7.2. Hydroprocessing of petroleum and tar materials	291
7.2.1. Destructive hydrogenation of heavy tar, shale and petroleum materials	293
7.2.2. Hydrocracking of petroleum and tar fractions	299
7.2.3. Hydrorefining and hydrodesulphurisation	309
7.2.3.1. Hydrorefining catalysts	312
7.2.3.2. Raw materials for hydrorefining and hydrorefining processes	325
7.2.3.2.1. Desulphurisation of gases	326
7.2.3.2.2. Hydrorefining and hydrodesulphurisation of gasolines	326
7.2.3.2.3. Hydrorefining of crude benzol	331
7.2.3.2.4. Hydrorefining of middle petroleum and tar distillates	332
7.2.3.2.5. Hydrorefining of lubricating oils, petroleum waxes and ceresins	341
7.2.3.2.6. Hydrorefining of residual oils and crude petroleum	344
7.2.3.2.7. Special desulphurisation procedures	352
7.2.3.3. Special desulphurisation procedures	353
7.3. Cracking and dehydrocracking of hydrocarbon mixtures	353
8. Isomerisation in the presence of sulphide catalysts	355
8.1. Chemistry and kinetics of isomerisation of hydrocarbons in the presence of sulphide catalysts	356
8.2. Review of isomerisation of individual hydrocarbons in the presence of sulphide catalysts	365
8.2.1. Isomerisation of paraffins	365
8.2.2. Isomerisation of olefins	366

8.2.3. Isomerisation of naphthenic and aromatic hydrocarbons	367
8.3 Isomerisation of hydrocarbon mixtures	367
9. Dehydrogenation and reforming in the presence of sulphide catalysts	370
9.1. Dehydrogenation of aliphatic hydrocarbons	371
9.2. Dehydrogenation and dehydroisomerisation of cyclic hydrocarbons	372
9.3. Dehydrocyclisation of aliphatic hydrocarbons	376
9.4. Dehydrogenation and reforming of raw materials in the petroleum industry in the presence of sulphide catalysts	378
9.4.1. The influence of sulphur compounds on the most important industrial reforming catalysts	378
9.4.2. The direct use of sulphide catalysts in reforming	381
9.5. Aromatising hydrogenation and the HTM process	382
9.6. Dehydrogenation of alcohols	383
9.7. Dehydrogenation of some nitrogen, sulphur and oxygen compounds	384
10. Oxidation in the presence of sulphide catalysts	385
10.1. Oxidation of sulphur compounds	385
10.2. Oxidation of hydrocarbons and asphalts	387
11. Polymerisation in the presence of sulphide catalysts	388
11.1. Polymerisation of hydrocarbons	388
11.2. Polymerisation of non-hydrocarbon compounds and some condensation reactions	390
12. The use of sulphide catalysts in inorganic reactions and in some special procedures	
12.1. The use of sulphide catalysts in reactions of hydrogen with elements, reduction of carbon monoxide and sulphur and nitrogen oxides and purification of gases	391
12.2. Special applications of sulphide catalysts	394
Bibliography	395
Author index	461
Subject index	489
Numerical patent index	400
