FOREWORD	v
ACKNOWLEDGMENTS	vi
CHAPTER 1. Introduction	1
CHAPTER 2. General Properties of Catalysis	4
Surface Structure	8
Active Patches	8
Physical Adsorption	11
The Potential Theory	12
Activated Adsorption	22
Conditions for Conversion of the Physically Adsorbed to the Chemisorbed State	22
Chemisorption	23
Catalytic Oxides and Sulphides	34
On the Poisoning of Catalysts	38
CHAPTER 3. Condensation and Evaporation	43
Surface Migration (Crystal Growth)	49
Spreading of Alkali Metals	50
On the Mechanism of Motion	57
CHAPTER 4. Thermal Changes and Reaction Kinetics	60
Chemi-adsorption Isotherms	60
On Heats of Adsorption	65
On Entropy Change on Adsorption	69
Formal Reaction Kinetics	74
On Absolute Reaction Rates	77
CHAPTER 5. Catalytic Oxidation	83
Metals	83
Hot Wire Reactions	84
Metal Oxides: Oxygen Exchange	86
The Hydrogen-Oxygen Catalysis	87
Charcoal as Oxidation Catalyst	87
Coupled Oxidation	90
Oxy-redox Levels	92
The Oxidation of Carbon Monoxide	93
The Oxidation of Sulphur Dioxide	95
Influence of Crystal Field	97
The Kinetics of Oxidation Catalysis	98
The Oxidation of Ethylene	103
Oxidation of Ammonia and Saturated Hydrocarbons	105

CHAPTER 6. Catalytic Hydrogenation	109
The Dissociation of Hydrogen	109
The Adsorption of Hydrogen	110
The Ortho-Para and Deuterium Exchange Reactions	113
The Synthesis of Ammonia	119
Catalysis at Electrodes	125
Oxy-redox Catalysis	135
CHAPTER 7. Catalysis in Hydrocarbons	136
Introduction	136
Hydrocarbon-Deuterium Interactions	137
Carbonium Ion Catalysts	149
Cracking Reactions	153
Chromium Oxide Catalysts	155
Carbanion Catalysis	157
Organometallic Catalysts	160
CHAPTER 8. Organic Syntheses and Decompositions	168
Cyclization	168
Aromatic Addition and Re-arrangements: The Raëcke Reaction	171
Ammonoxidation	171
Acrylic Acid	172
The Decomposition of Formic Acid	172
Decomposition of Alcohols	175
The Water Gas Shift Reaction	177
The Fischer Tropsch Reaction	185
SUBJECT INDEX	189
