PREFACE	ix
ACKNOWLEDGEMENTS	x
1 THE SHAPES OF SIMPLE MOLECULES	1
<i>A. D. WALSH, M.A., Ph.D., Professor of Chemistry, Queen's College, Dundee, University of St. Andrews (formerly of the University of Leeds)</i>	
Main Methods of Determining the Structures of Molecules ...	1
Results for the Ground States of Molecules	2
Empirical Generalizations	24
Theoretical Explanations of the Empirical Generalizations ...	29
2 THE CONFORMATIONS OF SIX-MEMBERED RING SYSTEMS... ..	36
<i>W. KLYNE, M.A., B.Sc., Ph.D., Reader in Biochemistry, Postgraduate Medical School, University of London</i>	
Definitions and Possible Structures... ..	37
Fundamental Methods of Investigation	42
Applications of the Concept of Non-Bonded Interaction Energy to More Complex Compounds... ..	47
The Consequences of Different Conformations	56
Boat Forms	78
Unsaturated Six-Membered Rings... ..	81
3 STEREOCHEMICAL FACTORS IN REACTION MECHANISMS AND KINETICS	90
<i>P. B. D. de la MARE, M.Sc., Ph.D., Lecturer in Chemistry, University College, London</i>	
Stereochemistry of Nucleophilic Substitution	90
Ester Hydrolysis and Esterification... ..	111
Stereochemistry of Nucleophilic Elimination	112
Stereochemistry of Addition Reactions	114
Steric Effects in Racemization of Derivatives of Diphenyl ...	120
4 THE RELATIONSHIPS BETWEEN THE STEREOCHEMISTRY AND SPECTROSCOPIC PROPERTIES OF ORGANIC COMPOUNDS ...	126
<i>E. A. BRAUDE, Ph.D., D.Sc., F.R.Z.C., Reader in Chemistry and E. S. WAIGHT, Ph.D., A.R.C.S., Assistant Lecturer in Chemistry, Imperial College of Science and Technology, University of London</i>	
Visible and Ultra-violet Light Absorption in Relation to Geometrical Isomerism about Double Bonds... ..	128
Ultra-violet Light Absorption in Relation to Steric Conformation about Single Bonds in Conjugated Systems	136

CONTENTS

	PAGE
4 THE RELATIONSHIPS BETWEEN THE STEREOCHEMISTRY AND SPECTROSCOPIC PROPERTIES OF ORGANIC COMPOUNDS— <i>contd.</i>	
Infra-red Light Absorption in Relation to Geometrical Isomerism about Double Bonds	156
Infra-red Light Absorption in Relation to the Conformation of Alicyclic Rings	164
5 THE CORRELATION OF CONFIGURATIONS	177
<i>J. A. MILLS, Ph.D., M.Sc., Division of Biochemistry and General Nutrition, Commonwealth Scientific and Industrial Research Organization, Adelaide, Australia, and</i>	
<i>W. KLYNE, M.A., B.Sc., Ph.D., Postgraduate Medical School, University of London</i>	
Methods Available for the Establishment of Configuration ...	182
Chemical Correlations without Disturbance of the Asymmetric Centre	182
Displacement Reactions Involving Asymmetric Centres... ..	194
Asymmetric Synthesis	198
Correlations from the Study of Quasi-racemic Compounds ...	201
Correlations from the Study of Optical Rotations... ..	204
Enzymic Evidence	213
X-ray Evidence	214
6 THE STEREOCHEMISTRY OF THE HYDROGEN BOND	223
<i>L. HUNTER, Ph.D., D.Sc., F.R.I.C., Professor of Chemistry, University College of Leicester</i>	
Is the Hydrogen Bond Linear ?	224
The Hydrogen Bond as a Directed Link	228
‘Hindered’ Alcohols and Phenols	233
The Hydrogen Bond and Geometrical Isomerism... ..	236
Hydrogen Bonding deduced from the Strength of Acids... ..	241
The Hydrogen Bond as a Factor in Crystal Structure	242
7 THE STEREOCHEMISTRY OF COMPOUNDS OF HIGH MOLECULAR WEIGHT... ..	250
<i>E. J. AMBROSE, M.A., The Chester Beatty Research Institute, The Royal Cancer Hospital, London</i>	
General Principles	250
Experimental Methods of Investigating High Polymer Structure	253
Long Chain Hydrocarbons... ..	257
The Structure of Proteins	263
Polymers containing Ring Structures in the Main Chain... ..	278
8 STEREOSPECIFICITY OF ENZYME REACTIONS... ..	285
<i>V. P. WHITTAKER, M.A., D.Phil., Assistant Professor of Physiology, University of Cincinnati, College of Medicine, Ohio, U.S.A.</i>	
Examples of Stereospecificity	286
Stereospecificity and the Mechanism of Enzyme Action... ..	316

CONTENTS

	PAGE
9 THE STEREOCHEMISTRY OF COMPLEX COMPOUNDS...	322
<i>R. S. NYHOLM, M.Sc., Ph.D., D.Sc. (Professor of Chemistry Elect at University College, London), Associate Professor of Inorganic Chemistry, New South Wales University of Technology, Sydney, Australia</i>	
Theoretical Basis of Stereochemistry	323
Physical Methods of Investigation	328
Stereochemistry in the Periodic Table	341
Steric Changes during Chemical Reactions	348
APPENDIX: BOND LENGTH AND VALENCY ANGLES	361
<i>ALLAN MACCOLL, M.Sc., Ph.D., Reader in Chemistry, University College, London</i>	
Bond Lengths...	361
Bond Angles	364
van der Waals' Radii	365
ADDITIONAL REFERENCES	366
SUBJECT INDEX	371
