

CONTENTS

SI Units

THERMODYNAMICS

1. First Law of Thermodynamics	3
2. Second and Third Laws of Thermodynamics	
3. One-Component Systems	81
4. Phase Equilibria	107
5. Chemical Equilibrium	149
6. Electromotive Force	191
7. Ionic Equilibria and Biochemical Reactions	221
8. Surface Thermodynamics	252

DYNAMICS

9. Kinetic Theory of Gases	273
10. Chemical Kinetics	300
11. Irreversible Processes in Solution	362

THREE QUANTUM CHEMISTRY

12. Quantum Theory	387
13. Symmetry	434
14. Molecular Electronic Structure	
15. Molecular Spectroscopy	
16. Magnetic Resonance Spectroscopy	
17. Statistical Mechanics	
18. Photochemistry	

FOUR STRUCTURE

19. Crystal Structure and Solid State	605
20. Macromolecules	643

Appendix	673
