

Contents

Chapter 1 Nuclear Magnetic Resonance Spectroscopy	
1 Introduction	1
Coupling Constants and Chemical Shifts	3
2 Stereochemistry of Complexes	6
π Complexes	6
Complexes with Phosphine (and Arsine) Ligands	11
Other Transition-metal Complexes	13
Compounds containing Tin	18
3 Dynamic Systems	18
Rotational and Conformational Exchange	19
π Complexes	20
Ligand Exchange	23
Equilibria in Multicomponent Systems	24
Monitoring the Course of Reactions	26
Ionic Solutions	30
4 Adducts and Solvent Effects	
5 Bonding Problems and Contact Shifts	38
π Interactions	38
Other Bonding Problems	41
Paramagnetic Species	42
6 Solid State Nuclear Magnetic Resonance	45
7 Boron and Other Group III Elements	47
Polyhedral Boranes and Carboranes	47
Derivatives of Monoborane and Diborane	50
Other Boron Adducts	53
Boron-Nitrogen Compounds	56
Boron-Oxygen Compounds	57
Other Group III Elements	58
8 Compounds of Fluorine and Phosphorus	59
Miscellaneous Fluoro-compounds	61

Fluorophosphorus Compounds	62
Phosphorus Compounds	64
9 Less-common Resonances	66
10 Appendix: Compounds not Referred to in Detail	67
Organometallic Compounds of Main-group Elements	68
Transition-metal Compounds and Complexes	72
π Complexes of Transition-metals	75
Chapter 2 Nuclear Quadrupole Resonance Spectra	79
Nitrogen-14	80
Chlorine-35 and Chlorine-37	80
Cobalt-59	84
Gallium-69 and -71	84
Bromine-79 and -81	84
Indium-115	84
Antimony-121 and -123	84
Iodine-127	84
Gold-197	85
Chapter 3 Electron Spin Resonance Spectroscopy	86
1 Introduction	86
2 Simple Molecules and Free Radicals	87
3 Complex Radicals	88
4 Transition-metal Complexes	90
Scandium	90
Titanium	90
Vanadium and Niobium	90
Chromium, Molybdenum, and Tungsten	91
Manganese	93
Iron	93
Cobalt, Rhodium, and Iridium	94
Nickel and Palladium	96
Copper	97
Silver	100
Zinc and Cadmium	100
Chapter 4 Microwave Spectroscopy	101
Di- and Tri-atomic Molecules	101
Tetra- and Penta-atomic Molecules	102

Hexa- and Hepta-atomic Molecules	103
Molecules with Eight, Nine, or Ten Atoms	104
More Complicated Species	105
Chapter 5 Vibrational Spectra	107
General Introduction	107
<i>Definitive Spectra of Small Molecules and Ions</i>	110
1 Diatomic Molecules and Ions	110
2 Triatomic Molecules and Ions	112
3 Tetra-atomic Molecules and Ions	114
4 Penta-atomic Molecules and Ions	117
5 Hexa-atomic Molecules and Ions	124
6 Octahedral Molecules and Ions	128
7 Larger Molecules and Ions	132
II Characteristic Frequencies of Inorganic Complexes	134
1 Main-group Elements	134
A Group II Elements	134
B Group III Elements	135
Compounds containing B—H Bonds	135
Compounds containing Al—H Bonds	138
Compounds containing M—C Bonds (M = Al, Ga, In, and Tl)	138
Compounds containing B—N or Al—N Bonds	139
Compounds containing B—O, Al—O, or B—S Bonds	139
Compounds containing M—Halogen Bonds (M = B, Al, Ga, In, and Tl)	140
C Group IV Elements	141
Compounds containing M—H Bonds (M = Si, Ge, and Sn)	141
Compounds containing M—C Bonds (M = Ge, Sn, and Pb)	142
Compounds containing M—M or M—M' Bonds (M, M' = Si, Ge, and Sn)	143
Compounds containing M—N Bonds (M = Si, Ge, and Sn)	143
Compounds containing Ge—P, Sn—P, or Sn—As Bonds	144

Compounds containing M—O Bonds (M = Si, Ge, and Sn)	145
Compounds containing Sn—S Bonds	145
Compounds containing M—Halogen Bonds (M = C, Si, and Sn)	146
D Group V Elements	147
Compounds containing P—H Bonds	147
Compounds containing P—C, As—C, or Sb—C Bonds	148
Compounds containing P=O, P=S, As=O, or Sb=S Bonds	149
Compounds containing M—Halogen Bonds (M = N, P, As, and Sb)	150
E Group VI Elements	151
F Group VII Elements	152
2 Transition Elements	153
A Titanium, Zirconium, and Hafnium	154
B Vanadium, Niobium, and Tantalum	155
C Chromium, Molybdenum, and Tungsten	157
D Manganese, Technetium, and Rhenium	160
E Iron, Ruthenium, and Osmium	161
F Cobalt, Rhodium, and Iridium	164
G Nickel, Palladium, and Platinum	168
Compounds containing M—N Bonds (M = Ni, Pd, and Pt)	169
Compounds containing M—P Bonds (M = Ni, Pd, and Pt)	171
Compounds containing M—Halogen Bonds (M = Ni, Pd, and Pt)	172
H Copper, Silver, and Gold	175
I Zinc, Cadmium, and Mercury	176
J Lanthanides and Actinides	179
III Vibrational Spectra of Some Co-ordinate Ligands	179
1 Olefins, Acetylenes, and Cyclic Polyenes	179
2 Carbonyls	180
3 Nitrogen Donors	185
Molecular Nitrogen and Azido-complexes	186
Amines and Related Ligands	188
Nitriles and Cyanides	190
Nitrosyls	192

4 Nitro- and Nitrito-complexes	
5 Cyanato-, Thiocyanato-, and Selenocyanato-complexes and their Respective Iso-complexes	195
6 Oxygen Donors	199
7 Sulphur and Selenium Donors	207
IV Appendices	210
Appendix 1: Additional References to Metal Carbonyl Complexes	210
Chromium Carbonyl Complexes	210
Molybdenum Carbonyl Complexes	212
Tungsten Carbonyl Complexes	215
Manganese Carbonyl Complexes	216
Rhenium Carbonyl Complexes	218
Iron Carbonyl Complexes	220
Ruthenium Carbonyl Complexes	223
Osmium Carbonyl Complexes	223
Cobalt Carbonyl Complexes	224
Rhodium Carbonyl Complexes	226
Iridium Carbonyl Complexes	226
Nickel Carbonyl Complexes	227
Appendix 2: Additional References to Vibrational Data on Inorganic Compounds	227
Beryllium	227
Boron	228
Aluminium, Gallium, Indium	231
Silicon	232
Germanium, Tin, Lead	234
Phosphorus	236
Phosphorus-Nitrogen Compounds	238
Arsenic, Antimony	240
Sulphur	240
Selenium, Tellurium	242
Fluorine, Chlorine, Iodine	243
Titanium	244
Chromium, Molybdenum, Tungsten	244
Cobalt, Rhodium	245
Nickel, Palladium, Platinum	245
Zinc, Cadmium	246
Chapter 6 Electronic Spectra	247
1 The Main-group Elements	247
Group III	248

Group IV	249
Group V	251
Group VI	253
Group VII	254
2 The Transition Elements	255
General Introduction	255
Scandium	258
Titanium, Zirconium, and Hafnium	258
Vanadium, Niobium, and Tantalum	261
Chromium, Molybdenum, and Tungsten	264
Manganese, Technetium, and Rhenium	272
Iron, Ruthenium, and Osmium	277
Cobalt, Rhodium, and Iridium	283
Nickel, Palladium, and Platinum	295
Copper, Silver, and Gold	308
Zinc, Cadmium, and Mercury	316
3 The Lanthanides and Actinides	317
The Lanthanides	317
The Actinides	320
4 Optically Active Co-ordination Compounds	322
Introduction	322
Amino-acid Complexes	324
Cobalt-Nitrogen Donor Complexes	325
Polynuclear Cobalt Complexes	328
Complexes of Chromium, Iron, Nickel, and Copper	329
Platinum and Palladium Complexes	330
Chapter 7 Mössbauer Spectroscopy	331
1 Introduction	331
2 Theoretical	332
3 Instrumentation	333
4 Iron-57	335
Compounds of Iron	337
Oxide and Sulphide Systems containing Iron	349
Interstitial Compounds and Alloys	357
5 Tin-119	359
6 Rare Earths	362
7 Other Elements	366
8 Bibliography	369

Author Index
