LIST OF CONTRIBUTORS	viii
FOREWORD	ix
PREFACE	x
CONTENTS OF PREVIOUS AND FUTURE VOLUMES	xi

Chapter 1 / Formal Kinetics

W. Jost

I. Introductory Remarks	1
II. Rate and Thermodynamics	5
III. Some Elementary Formal Relations	8
IV. Open and Closed Reaction Sequences. Establishment of a True or Pseudo-Steady State.	19
V. Stability. Thermal and Chain Explosions	30
VI. Systems of First-Order Reactions. Microscopic Reversibility, Relaxation Systems.	51
VII. Reactions near Equilibrium and close to Steady State. Reaction Rates and Thermodynamics.	63
VIII. Structure and Stability	68
References	72

Chapter 2 / Survey of Kinetic Theory

C. F. Curtiss

I. Statistical Concepts	78
II. Quantum Formulation	90
III. Boltzmann Equation	97

IV. Transport Properties	112
References	120

Chapter 3 / Potential Energy Surfaces

H. Eyring and S. H. Lin

I. Introduction	121
II. The Born–Oppenheimer Adiabatic Approximation	122
III. Valence Bond Method	127
IV. Examples	136
V. Orbital Symmetry in Reaction Kinetics	168
References	184

Chapter 4 / Theory of Energy Transfer in Molecular Collisions

E. E. Nikitin

I. General Remarks about Binary Molecular Collision	187
II. Translational to Rotational Energy Transfer (TR Processes)	191
III. Translational to Vibrational Energy Transfer (TV Processes)	197
IV. Transformation of Rotational and Translational Energy into Vibrational Energy (RV and TRV Processes)	208
V. Quasi-resonant Transfer of Vibrational Energy (VV Processes)	210
VI. Transformation of Translational, Rotational, and Vibrational Energy into Electronic Energy	213
VII. Influence of Nonadiabatic Effects on the Translational to Vibrational Energy Transfer	223
References	225

Chapter 5 / Molecular Beam Scattering Experiments on Elastic, Inelastic, and Reactive Collisions

J. Peter Toennies

I. Introduction	228
II. Experimental Techniques Used in Molecular Beam Scattering Experiments	231
III. Elastic Scattering Experiments	249
IV. Inelastic Scattering Experiments	296
V. Reactive Scattering Experiments	319
References	371

Chapter 6 / The Dynamics of Bimolecular Reactions*J. C. Polanyi and J. L. Schreiber*

I. The Microscopic and the Macroscopic	383
II. Detailed Models	402
III. Simple Models	454
References	481
AUTHOR INDEX	489
SUBJECT INDEX	500
