

# Contents

---

<b>General</b>	
Responsibility .....	1
Safety Considerations in Research Proposals .....	4
A Chemical Laboratory Safety Symposium for Highschool Students .....	7
An Exploratory Study of the Attitudes of Laboratory Workers Toward Accident Prevention ..	9
University Program in Laboratory Management and Safety .....	13
The Literature of Chemical Safety .....	16
Sources of Information of Hazards.....	19
<b>Toxicity and Exposure Limits</b>	
Mercury Vapor Hazards and Control Measures ..	23
The Use of Biological Samples in Evaluating Toxic Exposures in the Laboratory .....	27
Threshold Limit Values, 1966 .....	30
A Practical Approach to Protection of Laboratory Personnel from Toxic Materials.....	35
<b>Ventilation</b>	
Ventilation of Laboratory Operations .....	37
<b>Fire, Flammable Liquids, Labeling, Storage, and Emergency Procedures</b>	
The Use of Flammable Liquids .....	42
Fire Protected Storage For Records and Chemicals .....	44
Containers and Labeling .....	48
A New Safety Label for Fire Extinguishers.....	50
Fire, Emergency and Rescue Procedures.....	51
Emergency Exhaust Ventilation .....	54
<b>Eye Protection and Shielding</b>	
Eye Protection in Laboratories .....	55
The Use of Eye Protection and Body Shields in College Chemical Laboratories .....	57
The Establishment of a University Eye Protection Program .....	58
Shields and Barricades for Chemical Laboratory Operations .....	60
Shielding and Laboratory Explosions .....	62
Safety Techniques for Research and Development of New High Energy Oxidizers .....	63
<b>Peroxides and Dangerous Chemicals</b>	
Control of Hazards from Peroxides in Ethers .....	68
Benxoyl Peroxide Requires Special Handling and Storage .....	71
Storage and Disposal of Dangerous Chemicals ..	72
<b>Compressed Gases and Cryogenic Fluids</b>	
Compressed Gas Cylinders and Cylinder Regulators Used in Laboratories .....	76
Cryogenic Safety .....	79
<b>Control of Unattended Laboratory Operations</b>	
The Safety Operation of Laboratory Distillations Over Night .....	83
Running Laboratory Operations Under Safe Control .....	87
<b>Drinking Water Supplies, Lasers and Microbiological Hazards</b>	
Prevention of Contamination of Drinking Water Supplies .....	94
Microbiological Hazards in the Laboratory .....	98
Lasers and Masers, Control of Health Hazards..	105
Laser Laboratory Design and Personnel Protection from High Energy Lasers .....	108
<b>Laboratory Design Considerations for Safety</b>	
Laboratory Design Considerations .....	112
<hr/>	
Accident Case Histories .....	116
Laboratory Fire Reports .....	119
Subject Index .....	122
Author Index .....	125
