Preface xiii

SECTION 1 Techniques and Procedures 1

A. What Is a Chemical Technician? 3

- What Should a Technician Know? 4
- What Does a Technician Do? 6
- The Chemical Technician as a Communicator 7
- Planning and Procedure 11

B. Laboratory Techniques and Procedures 17

- Gas Burners 17
- Laboratory Glass Equipment 18
- Handling Reagents and Solutions 23
- Removal of Solid Materials from Glass-stoppered Bottles 24
- Pouring Liquids from Bottles 25
- Pouring Liquids from Beakers or Other Containers 25
- Emergency Hood 26
- Thermometers 27

C. Heating, Sublimation, Evaporation, and Centrifuging 33

- Heating Nonflammable Liquids 33
- Heating Flammable Liquids 34
- Heating Organic Liquids and Aqueous Solutions 35
- Sublimation 36
- Evaporation of Liquids 36
- Centrifuges 39

D. Interjoint Glassware 41

- Size Designation 42
- Ground-Glass Joints and Clamps 42
- Ground-Glass Equipment Components and Assemblies 44
- Care of Ground-Glass Surfaces 52

Assembly of Ground-Glass Apparatus	53
Cleaning and Storage	53
Safety	54
Loosening "Frozen" Stoppers and Stopcocks	54

E. Mechanical Agitation 55

Choice of Motor Drive	55
Bearing Assemblies	55
Magnetic Mechanical Agitation	56

F. Determination of Physical Properties 57

Density	57
Specific Gravity	58
Melting Points	61
Extraction	63
Filtration	65
Purification of Solids by Recrystallization	77
Constant-Temperature Baths	80
Cooling Baths	80
Drying Organic Liquids	81
Boiling Point of Liquids	82
Vacuum Pumps: Use, Care, and Maintenance	83
Gas Regulators: Use and Operation	96
Simple Distillation	100
Azeotropic Distillation	103
Fractional Distillation	103
Vacuum Distillation	106
Steam Distillation	110
Refluxing	111
Soxhlet Extraction	113

G. Basic Chemistry 115

Chemical Symbols, Atomic Weight, and Atomic Numbers	116
Nomenclature of Inorganic Compounds	119
Molecular Relationships from Equations	125
Weight Relationships from Equations	126
Volume Relationships from Chemically Balanced Equations	127
Chemical Calculations and Computations	127
Measurement of Gases	140
Solubility Rules for Common Inorganic Compounds	142
Flame Tests for Identification of Elements	142

H. Grades of Purity of Chemicals 1'45

Preparation of Standard Laboratory Solutions 146

I. Basic Concepts in Organic Chemistry 155

Types of Organic Compounds 155
 Alcohols 161
 Phenols 162
 Ethers 162
 Carboxylic Acids 163
 Amines 166
 Aldehydes and Ketones 166
 Polynuclear Aromatic Compounds 167
 Polymers 167
 Functional Group Analysis 168

J. The Balance 175

Measurement 176
 Weighing 178

K. The Technician and His Sample 191

Crushing and Grinding of Laboratory Samples 191
 Moisture in Samples 192
 Preparing the Sample for Final Analysis 194
 Weighing Samples 203
 Drying Samples 204

L. Volumetric Analysis 207

Definition of Terms 207
 Reading the Meniscus 209
 Tools of Volumetric Analysis 210
 Syringe-handling Techniques in Chromatography 218

M. pH Measurement 221

Background 221
 Titrations 224

N. Activity Series of the Metals (The Electromotive Series) 235

Prevention of Corrosion 236

O. An Introduction to Mass Spectrometry 239

Introduction	239
Atomic and Molecular Physics	239
Electricity and Magnetism	241
Instrument Design	241
MS-type Analyses	243

P. Determination of Elements in Organic Compounds 245

Microdetermination of Carbon and Hydrogen	245
Procedure for the Determination of Carbon and Hydrogen in Organic Compounds by a Micromethod	247
Microdetermination of Nitrogen	252
Determination of Halogen	254
Determination of Sulfur (Elemental)	257
Polarimeter	261
Abbe Refractometer	262
pH Meter	264
Colorimetric pH Measurements—Indicators	266
Bausch and Lomb Spectronic 20	267
Coleman Junior Spectrophotometer, Models 6A, 6C, and 6D	268
Duboscq Colorimeter	269

Q. Electricity 271

Theory	271
Servicing Inoperative Electrical Devices	276
Alternating and Direct Current	278
Safety	278
Electric Motors	278
Belts, Pulleys, and Power Transmission	280
Making Electrical Connections	282
Grounding Electrical Equipment	285
Electric-Circuit Elements	289

R. Useful Tables 291

SECTION 2 Equipment 297

SECTION 3	Practical Reference Information	367
A.	Glossary of Important Terms	369
B.	Metric System	379
C.	Signs and Symbols Commonly Used	381
D.	Prefixes Commonly Used	383
E.	Abbreviations Commonly Used	385
F.	Arithmetic	387
G.	The Slide Rule	407
H.	Common Hazardous Chemicals	431

Index follows Section 3
