Foreword *XV***Preface** *XVII*

1	Introduction	<i>1</i>
1.1	Historical	<i>1</i>
1.1.1	Early Developments	<i>1</i>
1.1.2	Growth and Maturity	<i>4</i>
1.1.3	Milestones and The Future	<i>6</i>
1.2	The Theoretical Basis	<i>7</i>
1.3	Technical Requirements	<i>11</i>
1.4	References	<i>16</i>
2	From Planning to Production	<i>20</i>
2.1	Material Collection and Preparation	<i>20</i>
2.1.1	Introduction	<i>20</i>
2.1.2	General Collection and Preparation Principles	<i>22</i>
2.1.3	Specific Examples	<i>26</i>
2.1.4	Concluding Remarks and Recommendations	<i>30</i>
2.2	Control of Material Properties	<i>31</i>
2.2.1	Particle Size and Particle Size Distribution	<i>31</i>
2.2.2	Homogeneity/Heterogeneity	<i>33</i>
2.2.3	Humidity (Water Content)	<i>37</i>
2.2.4	Degradation Studies/Shelf Life	<i>40</i>
2.3	References	<i>43</i>
3	Certification	<i>49</i>
3.1	Certification Philosophy of RM Producers	<i>49</i>
3.1.1	Introduction	<i>49</i>
3.1.2	Approaches to the Characterization/Certification of Reference Materials	<i>50</i>
3.1.2.1	General Principles of Certification	<i>50</i>
3.1.2.2	Classification of Characterization/Certification Schemes	<i>52</i>
3.1.2.3	Specific Examples	<i>58</i>

3.1.3	Conclusions	60
3.2	Certification of Elements	60
3.2.1	Methods Used for the Certification of RMs for Elements	60
3.2.2	Multi-Method Elemental RM Certification	64
3.2.2.1	River Sediment	64
3.2.2.2	Lichen	65
3.2.2.3	Examples of Selected RMs Certified for Elements	66
3.2.3	Certification of Element Contents by Neutron Activation Analysis	66
3.2.3.1	General Features	66
3.2.3.2	Internal Cross-Checking (Self-Verification) in NAA	68
3.2.3.3	Applications in Certification and Analysis	69
3.2.3.4	NAA for the Detection of Errors	73
3.2.3.5	Summary	74
3.3	Certification of Organometallic and Other Species	75
3.3.1	Introduction	75
3.3.2	Potential Sources of Error in Speciation Analysis	76
3.3.3	Restricted List of Chemical Species for Trace Elements and Their Compounds	77
3.3.3.1	Aluminum	77
3.3.3.2	Antimony	77
3.3.3.3	Arsenic	77
3.3.3.4	Bromine	78
3.3.3.5	Chromium	78
3.3.3.6	Mercury	79
3.3.3.7	Lead	80
3.3.3.8	Selenium	81
3.3.3.9	Tin	81
3.3.3.10	Metallothionein	82
3.3.4	Fractionation	82
3.3.5	Conclusions	82
3.4	Certification of Organic Substances	83
3.4.1	Introduction	83
3.4.2	CRMs Available for Organic Constituents	84
3.4.2.1	Pure Substances	84
3.4.2.2	Calibration Solution CRMs	85
3.4.2.3	Natural Matrix SRMs	85
3.4.3	Certification Approach for Organic Constituents	88
3.4.3.1	NIST Approach for Certification	89
3.4.3.2	NIST Analytical Approach for the Certification of Organic Constituents in Natural Matrix SRMs	91
3.4.3.3	BCR Approach to Certification	97
3.5	References	101
4	Particular Developments	111
4.1	RMs in Quality Control and Quality Assessment	111

- 4.1.1 Introduction 111
- 4.1.2 Proper Usage 113
- 4.1.3 Characterization of Methods 113
- 4.1.4 Internal Quality Control 115
- 4.1.5 External Quality Assurance 117
 - 4.1.5.1 State of the Art 118
 - 4.1.5.2 Performance of Individual Laboratories 119
 - 4.1.5.3 Supplement Internal Quality Control 119
 - 4.1.5.4 To Obtain Consensus Values 119
 - 4.1.5.5 Investigate Factors Contributing to Performance 120
 - 4.1.5.6 To Act as an Educational Stimulus To License Laboratories? 120
- 4.1.6 Conclusions 121
- 4.2 Fresh Materials 121
 - 4.2.1 Introduction 121
 - 4.2.2 Packing Materials 122
 - 4.2.3 Preparation 124
 - 4.2.4 Homogeneity 125
 - 4.2.5 Stability 126
- 4.3 Certified Reference Materials for Microanalytical Methods 127
 - 4.3.1 Homogeneity of Components in CRMs 129
 - 4.3.2 A Priori and a Posteriori Homogeneity of Materials 130
 - 4.3.3 Aspects of Homogeneity Determination 131
 - 4.3.4 Examples 132
 - 4.3.4.1 Homogeneity Determinations with Solid Sampling Atomic Absorption Spectrometry 133
 - 4.3.4.2 Homogeneity Determinations with Instrumental Neutron Activation Analysis (INAA) 134
 - 4.3.4.3 Uncertainty Budget of INAA 135
 - 4.3.4.4 Homogeneity Factors in Test Materials Determined with INAA 136
 - 4.3.5 Conclusion 137
- 4.4 CRMs as calibrants 138
 - 4.4.1 Principles 138
 - 4.4.2 Calibration Techniques 139
 - 4.4.3 Examples 140
 - 4.4.3.1 Biological Materials 140
 - 4.4.3.2 Environmental and Geological Materials 141
 - 4.4.3.3 Technical Materials 142
 - 4.4.4 Conclusion 143
- 4.5 RMs for Radioisotopes, Stable Isotopes and Radiopharmaceuticals 143
 - 4.5.1 Radioisotopes 143
 - 4.5.1.1 Requirements and uses 143
 - 4.5.1.2 Available Reference Materials 144
 - 4.5.1.3 Future Developments 146
 - 4.5.2 Stable Isotopes 146
 - 4.5.2.1 Requirements and uses 146

4.5.2.2	Future Developments	147
4.5.3	Radiopharmaceuticals	147
4.6	References	148
5	Reference Materials for “Life” Analysis	154
5.1	Standard Reference Materials for Microbiological Assays	154
5.1.1	Standards for Official Assays and Tests	155
5.1.2	Quality Management of Biological RMs	156
5.2	Certified Microbiological Culture Materials	158
5.3	Reference Materials for DNA Analysis	160
5.3.1	SRM 2390	160
5.3.2	SRM 2391	161
5.3.2.1	Recertification of SRM 2391	162
5.3.3	SRM 2392	163
5.3.3.1	DNA Source	163
5.3.3.2	Inter-Laboratory Evaluation of SRM 2392	164
5.3.4	Summary	164
5.4	Future Developments in Molecular Reference Materials	171
5.5	Reference Substances and Spectra for Pharmaceutical Analysis	172
5.5.1	Introduction	173
5.5.2	Definitions and Guidelines	174
5.5.3	Uses of Pharmacopoeial Reference Substances	175
5.5.3.1	Reference Substances Used for Identification	175
5.5.3.2	Reference Substances Used for Related Substance Tests	176
5.5.3.3	Reference Substances Used for Assay	180
5.5.3.4	Minimizing the Use of Reference Substances	180
5.5.4	Procurement of Candidate Reference Substances	181
5.5.5	Requirements for Candidate Reference Substances	182
5.5.6	Evaluation	182
5.5.6.1	Reference Substances Used for Identification	182
5.5.6.2	Reference Substances Used for Related Substance Tests	183
5.5.6.3	Reference Substances Used for Assay	183
5.5.6.4	CRS as Calibrators	189
5.5.7	Monitoring Programme	189
5.5.8	Packaging and Filling	190
5.5.9	Certificates of Analysis / Expiry Date / Catalogue	191
5.5.10	Storage and Distribution	192
5.5.11	International Harmonization	192
5.6	References	193
6	General Application Fields	196
6.1	Workplace Air Monitoring	196
6.1.1	Introduction	196
6.1.2	Solvents	197
6.1.3	Elements and Inorganic Compounds	198

6.1.4	Asbestos	199
6.2	Clinical Application Fields	199
6.2.1	Introduction	199
6.2.2	Elements	201
6.2.2.1	Essential Electrolytes	202
6.2.2.2	Essential Trace Elements	202
6.2.2.3	Elements Therapeutically Used	203
6.2.2.4	Non-Essential Elements	204
6.2.3	Organic Compounds	206
6.2.3.1	Solvents	206
6.2.3.2	Polyaromatic Hydrocarbons (PAH)	207
6.2.3.3	Pesticides	207
6.2.3.4	Persistent Compounds	207
6.2.4	Proteins and Enzymes	207
6.2.5	Lipids	209
6.2.6	Other Compounds	209
6.3	Food/Biological	210
6.3.1	Introduction	210
6.3.2	Food Matrix Triangle	211
6.3.3	Available Reference Materials	214
6.3.4	Mode of Application and Application Examples	214
6.3.4.1	Procedures for Reference Material Selection and Use	217
6.3.4.2	Procedures for Reference Material Utilization	217
6.3.4.3	Performance Interpretation and Corrective Action	217
6.3.4.4	Examples of Application of RMs to Certification of other RMs	218
6.3.4.5	Examples of Applying RMs in Analyses	218
6.4	Applications of Reference Materials in the Geological Sciences	220
6.4.1	Introduction	220
6.4.2	Producers of Geochemical Reference Materials	222
6.4.3	General Application: Calibration of Instrumental Measurements	223
6.4.4	General Application: Method Development and Validation	224
6.4.5	General Application: Quality Control in Multilaboratory, or Long-Term Within Laboratory, Studies	224
6.4.6	Specific Application: Geochemical Exploration	225
6.4.7	Specific Application: Petrogenic Modelling Based on Bulk Rock Analysis	227
6.4.8	Specific Application: Petrogenic Modelling Based on Microanalysis	228
6.4.9	Application: Studies of Paleoclimates	228
6.4.10	Summary	229
6.5	References	229
7	Proper Usage of Reference Materials	236
7.1	Selection, Use, and Abuse of RMs	236
7.1.1	Conventional "Proper" Uses of RMs	237
7.1.1.1	Method Development and Evaluation	237

7.1.1.2	Assurance of Measurement Compatibility	237
7.1.1.3	Establishment of Measurement Traceability	237
7.1.2	Mis-Use and Other Causes of Errors	238
7.1.2.1	Documentation Errors	238
7.1.2.2	Selection Errors	239
7.1.2.3	Handling and Use Errors	241
7.1.2.4	Storage	241
7.1.2.5	Shelf Life and Expiration Dates	241
7.1.2.6	Sampling and Preparation of RMs for Analysis	242
7.1.2.7	Sample Characteristics	243
7.1.3	Continuity	244
7.1.4	Artifacts	244
7.1.5	Data Interpretation Errors	245
7.1.6	Reporting Errors	246
7.2	Statistical Consequences in the Assurance of Measurement Compatibility	247
7.2.1	Uncertainty	247
7.2.2	Indicative Approach to Quantifying Uncertainty	248
7.3	Traceability	249
7.3.1	Definition	249
7.3.2	Practical Aspects	250
7.4	Conclusions	252
7.5	References	253
7.6	Further Reading	254
8	Availability and Sources of Information	256
	Introduction	256
8.1	Printed Publications	257
8.1.1	Catalogs, Lists, and Directories	257
8.1.2	Journals	259
8.2	Electronic Sources and the Internet	262
8.2.1	The “COMAR” Database	262
8.2.2	The IAEA Database	264
8.2.3	WinRefPro Database of Elements in Metals	265
8.2.4	Website Addresses	266
8.3	Organizations and Symposia	267
8.3.1	Organizations	267
8.3.1.2	AOAC International	267
8.3.1.3	EURACHEM	268
8.3.1.4	VAM	269
8.3.2	Conferences and Meetings	269
8.3.2.1	BERM	269
8.3.2.2	Other Meetings	272
8.4	The Pharmacopoeia	273
8.4.1	United States Pharmacopoeia	273

8.4.2	The European Pharmacopoeia	273
8.4.3	The British Pharmacopoeia	274
8.5	The Movement of Reference Materials	274
8.6	References	277
9	Future Trends for Reference Material Activity	279
	Introduction	279
9.1	Overview of General Issues	280
9.1.1	Review of Trends	280
9.1.2	Projection of Challenges	280
9.1.3	Analysis of Driving Forces and Construction of Scenarios	281
9.1.4	Thinking “Outside the Box”	282
9.1.5	Future Projections	283
9.1.6	Selecting Strategies	285
9.2	Needs for Specific Reference Materials	286
9.3	Reference Material Needs for Regulatory Nutrient Analysis	287
9.4	Perspectives from Distributors of Certified Reference Materials	289
9.5	RM Needs in Developing Countries	290
9.6	References	291
	About the genesis of this book	293
	Subject Index	295
