<b>Acetanilide R</b> . . . . .	<b>25</b>																																																																																																																																												
Acetic acid, glacial. R . . . . .	25																																																																																																																																												
Acetic anhydride R . . . . .	26																																																																																																																																												
Acetone R. . . . .	27																																																																																																																																												
Adrenaline bitartrate R . . . . .	27																																																																																																																																												
Agar R . . . . .	27																																																																																																																																												
Almond oil, expressed. R . . . . .	28																																																																																																																																												
<b>Alum R</b> . . . . .	<b>29</b>																																																																																																																																												
Aluminium R . . . . .	29																																																																																																																																												
Aluminium chloride R . . . . .	30																																																																																																																																												
Aminoacetic acid R. . . . .	30																																																																																																																																												
Ammonia, strong. R . . . . .	31																																																																																																																																												
Ammonium acetate R. . . . .	32																																																																																																																																												
Ammonium carbonate R . . . . .	33																																																																																																																																												
Ammonium chloride R . . . . .	33																																																																																																																																												
Ammonium molybdate R . . . . .	34																																																																																																																																												
Ammonium nitrate R . . . . .	35																																																																																																																																												
Ammonium <b>nitrosophenylhydroxyl-amine</b> R . . . . .	36																																																																																																																																												
Ammonium <b>oxalate</b> R . . . . .	36																																																																																																																																												
Ammonium persulfate R . . . . .	37																																																																																																																																												
Ammonium phosphate R . . . . .	38																																																																																																																																												
Ammonium <b>reineckate</b> R . . . . .	39																																																																																																																																												
Ammonium sulfamate R . . . . .	39																																																																																																																																												
Ammonium sulfate R . . . . .	40																																																																																																																																												
Ammonium thiocyanate R. . . . .	40																																																																																																																																												
Ammonium <b>vanadate</b> R . . . . .	41																																																																																																																																												
<b>Amyl</b> acetate R . . . . .	41																																																																																																																																												
<b>Amyl</b> alcohol R . . . . .	42																																																																																																																																												
Amylene hydrate R . . . . .	42																																																																																																																																												
Aniline R . . . . .	43																																																																																																																																												
<b>Arsanilic</b> acid R . . . . .	43																																																																																																																																												
Arsenic <b>trioxide</b> R . . . . .	44																																																																																																																																												
Ascorbic acid R . . . . .	45																																																																																																																																												
Atropine methonitrate R . . . . .	45																																																																																																																																												
Atropine sulfate R . . . . .	45																																																																																																																																												
Barium chloride R . . . . .	45																																																																																																																																												
Barium hydroxide R . . . . .	46																																																																																																																																												
Barium nitrate R . . . . .	47																																																																																																																																												
Benzaldehyde R . . . . .	47																																																																																																																																												
Benzalkonium chloride R . . . . .	48																																																																																																																																												
Benzene R. . . . .	48																																																																																																																																												
<b>Benzidine R</b> . . . . .	<b>49</b>																																																																																																																																												
<b>Benzoyl</b> chloride R . . . . .	<b>50</b>																																																																																																																																												
Benzyl benzoate R . . . . .	50																																																																																																																																												
Bismuth oxynitrate R . . . . .	50																																																																																																																																												
Bismuth subcarbonate R . . . . .	51																																																																																																																																												
Boric acid R . . . . .	51																																																																																																																																												
Bromine R . . . . .	51																																																																																																																																												
Bromocresol green R . . . . .	52																																																																																																																																												
Bromocresol purple R . . . . .	52																																																																																																																																												
Bromophenol blue R . . . . .	52																																																																																																																																												
Bromothymol blue R . . . . .	53																																																																																																																																												
<b>Brucine R</b> . . . . .	<b>53</b>																																																																																																																																												
iso-Butanol R . . . . .	53																																																																																																																																												
n-Butanol R . . . . .	54																																																																																																																																												
Cadmium iodide R . . . . .	54																																																																																																																																												
Cadmium sulfate R . . . . .	55																																																																																																																																												
Calcium acetate R . . . . .	56																																																																																																																																												
Calcium carbonate R . . . . .	56																																																																																																																																												
Calcium chloride R . . . . .	58																																																																																																																																												
Calcium chloride, hydrated. R . . . . .	58																																																																																																																																												
Calcium hydroxide R . . . . .	59																																																																																																																																												
Calcium oxide R . . . . .	60																																																																																																																																												
Calcium sulfate R . . . . .	62																																																																																																																																												
Calcium sulfate, anhydrous. R . . . . .	62																																																																																																																																												
Carbon dioxide R . . . . .	62																																																																																																																																												
Carbon disulfide R . . . . .	62																																																																																																																																												
Carbon tetrachloride R . . . . .	63																																																																																																																																												
<b>Ceric</b> sulfate R . . . . .	<b>63</b>

Potassium periodate R . . . . .	164	Sodium silicate R . . . . .	194
<b>Potassium permanganate</b> R . . . . .	165	Sodium sulfate R . . . . .	194
Potassium sulfate <b>R</b> . . . . .	165	Sodium sulfate, anhydrous, R .	195
Potassium tetraoxalate <b>R</b> . . . . .	166	Sodium sulfide <b>R</b> . . . . .	195
Potassium <b>xanthogenate</b> R . . . . .	167	Sodium sulfite R . . . . .	196
Procaine hydrochloride R . . . . .	167	Sodium thiosulfate R . . . . .	197
<b>iso-Propanol</b> R . . . . .	167	Sodium tungstate R . . . . .	197
Propylene glycol R . . . . .	168	Stannous chloride R . . . . .	198
<b>Protamine</b> R . . . . .	168	Starch, corn, R . . . . .	199
<b>Pyridine</b> R . . . . .	169	Starch, potato, R . . . . .	199
<b>Pyrogallol</b> R . . . . .	170	Starch, soluble, R . . . . .	199
Quinaldine red R . . . . .	170	Starch-iodate paper R . . . . .	200
<b>Resazurin</b> sodium R . . . . .	170	Starch-iodide paper R . . . . .	200
<b>Resorcinol</b> R . . . . .	171	Streptomycin R . . . . .	200
<b>Rhodamine B</b> R . . . . .	171	Strychnine sulfate R . . . . .	200
Riboflavin R . . . . .	171	Sucrose R . . . . .	200
Salicylic acid R . . . . .	171	Sulfanilic acid R . . . . .	201
Selenium R . . . . .	172	Sulfathiazole R . . . . .	201
<b>Semicarbazide</b> hydrochloride R . .	172	Sulfur dioxide R . . . . .	202
Sesame oil R . . . . .	172	Sulfur, sublimed, R . . . . .	202
<b>Silicon</b> carbide R . . . . .	173	Sulfuric acid R . . . . .	202
<b>Silicotungstic</b> acid R . . . . .	173	Sulfuric acid, fuming, R . . . . .	204
Silver nitrate R . . . . .	173	Sulfurous acid R . . . . .	204
Soda lime R . . . . .	174	Suxamethonium chloride R . . . . .	204
<b>Sodium</b> R . . . . .	175	Talc R . . . . .	204
Sodium acetate R . . . . .	176	Tannic acid R . . . . .	205
Sodium acetate, anhydrous, R . . .	177	Tartaric acid R . . . . .	205
Sodium bicarbonate R . . . . .	177	Testosterone propionate R . . . . .	206
Sodium biphosphate R . . . . .	178	<b>Tetrachlorobenzoquinone</b> R . . . . .	206
Sodium borate <b>R</b> . . . . .	179	<b>Thioglycolic</b> acid R . . . . .	206
Sodium bromide R . . . . .	179	Thiourea R . . . . .	207
Sodium carbonate R . . . . .	179	<b>Thymol</b> blue R . . . . .	207
Sodium carbonate, anhydrous, R .	179	Thymolphthalein R . . . . .	207
Sodium chloride R . . . . .	181	<b>Tin</b> R . . . . .	207
Sodium <b>citrate</b> R . . . . .	181	Titan yellow R . . . . .	208
Sodium <b>cobaltinitrite</b> R . . . . .	182	Titan yellow paper R . . . . .	208
Sodium cyanide R . . . . .	182	Titanium trichloride R . . . . .	208
Sodium <b>diethyldithiocarbamate</b> R .	183	Toluene R . . . . .	209
Sodium fluoride R . . . . .	183	<b>1,1,1-Trichloro-2,2-bis-</b> (4'-chlorophenyl) ethane R . . .	209
Sodium <b>hydrosulfite</b> R . . . . .	184	<b>Trichloroacetic</b> acid . . . . .	209
Sodium hydroxide R . . . . .	185	Trihexyphenyldyl hydrochloride <b>R</b> .	210
Sodium hypophosphite R . . . . .	186		

Page	Page		
Triketohydrindene hydrate R . . . . .	210	Vanillin R . . . . .	214
Trimethylacethydrazide ammonium chloride R . . . . .	211	Xanthydrol R . . . . .	214
<b>Trinitrophenol R . . . . .</b>	<b>211</b>	<b>Xylene R . . . . .</b>	<b>215</b>
Triphenyltetrazolium chloride R . . . . .	211	Yeast extract, water-soluble, R . . . . .	215
<b>Turmeric R . . . . .</b>	<b>212</b>	<b>Zinc R . . . . .</b>	<b>216</b>
Turmeric paper R . . . . .	212	<b>Zinc acetate R . . . . .</b>	<b>216</b>
<b>Tyrosine R . . . . .</b>	<b>212</b>	Zinc chloride R . . . . .	217
Uranyl acetate R . . . . .	213	Zinc oxide R . . . . .	218
<b>Urea R . . . . .</b>	<b>214</b>	Zinc sulfate R . . . . .	218
Reagents and test solutions needed for the monographs in this volume . . . . .			
219			
Solutions employed in volumetric determinations . . . . .			
229			
Standard solutions for control . . . . .			
233			
General tests for reagents . . . . .			
237			
Limit test for arsenic . . . . .	237	Determination of optical rotation and specific rotation . . . . .	251
Determination of boiling-range . . . . .	240	Determination of pH . . . . .	251
Limit test for chloride. . . . .	241	Limit test for phosphate . . . . .	251
Determination of density . . . . .	242	Determination of refractive index .	252
Limit test for heavy metals . . . . .	242	Determination of residue on ignition	252
Determination of insoluble matter . . . . .	244	Determination of saponification value	252
Determination of iodine value . . . . .	244	Determination of sodium and potassium by the method of flame photometry . . . . .	253
Limit test for iron . . . . .	245	Limit test for sulfate . . . . .	254
Limit test for lead . . . . .	245	Determination of water by the Karl Fischer method . . . . .	255
Determination of melting-range, melting-temperature and congealing-temperature . . . . .	247		
Determination of methoxyl . . . . .	249		
Determination of nitrogen compounds . . . . .	250		
Index . . . . .			259
