Preface	xv
Study Guide.	xvii
Glossary of Terms	xxi ✓
List of Acronyms.	xxv
Bibliography	xxvii
Acknowledgements.	xxviii
1. Introduction to Quality Assurance	1
1.1. What do we mean by Quality?	3
1.2. Customer Requirements and the Analyst	5
1.3. Importance of Chemical Analysis.	7
1.4. Quality Systems, Quality Control and Quality Assurance	8
1.5. The Need for a Quality System.	11
1.6. Evidence of Unreliable Data.	12
1.7. Benefits of Good Data	16
1.8. How do You and Your Laboratory Measure up to the Competition?	18
1.8.1. Collaborative Study and Certification Schemes	19
1.8.2. Problems with Interlaboratory Schemes	20
1.8.3. Proficiency Testing Schemes	20
1.8.4. Organisation of Proficiency Testing Schemes	22
1.8.5. Example of Proficiency Testing Exercise.	24
1.8.6. Conclusion.	29
References	32
2. Sampling	33
2.1. Sampling Defined	36

2.2. Types of Samples	37
2.2.1. Representative Sample	37
2.2.2. Selective Sample	38
2.2.3. Random Sample	38
2.2.4. Composite Sample	39
2.3. Sampling Plan	41
2.3.1. Legal and Statutory Requirements	41
2.3.2. Sampling Schemes	42
2.4. Quality of Sample	44
2.5. Adequacy of Samples for the Analysis Requested	46
2.5.1. Sampling Uncertainty	46
2.5.2. Measurement Situations	47
2.5.3. Number of Primary Samples	50
2.6. Subsampling.	50
2.6.1. Subsampling Procedure	52
2.7. Sample Registration and Storage	53
2.7.1. Holding Time	53
2.7.2. Sample Disposal	54
2.8. Acceptance Sampling—Inspection by Attributes, Lot-by-Lot Inspection.	55
2.8.1. Drawing a Sampling Plan From the Tables in ISO 2859-1 (BS 6001)	56
2.8.2. Sampling Plan Example	60
References	66
3. Selecting the Method	67
3.1. Purpose of Analysis.	67
3.2. Sources of Methods.	69
3.3. Factors to Consider in Choosing a Method.	72
3.3.1. Limit of Detection	73
3.3.2. Accuracy	73
3.3.3. Precision	73
3.3.4. Speed	74
3.3.5. Equipment Required.	74
3.3.6. Sample Size	74
3.3.7. Cost	75
3.3.8. Safety	75
3.3.9. Specificity.	75
3.3.10. Making Your Choice	76

3.4. Performance Criteria for Methods Used to Determine Analyte Concentrations in Samples with a Complex Matrix	78
3.5. Criteria for the Determination of Analytes by Selected Techniques	82
3.5.1. Thin Layer Chromatography	82
3.5.2. Gas Chromatography	83
3.5.3. Liquid Chromatography	84
3.5.4. Mass Spectrometry	85
3.5.5. Infrared Spectroscopy	85
3.6. Reasons for Incorrect Analytical Results	86
3.6.1. Incompetence	87
3.6.2. Method Used.	87
3.6.3. Contamination	88
3.6.4. Interferences	88
3.6.5. Calibration.	90
3.6.6. Sampling	91
3.6.7. Losses/Degradation	91
3.7. Validation of Analytical Methods.	91
3.7.1. Replication	92
3.7.2. Recovery Tests	93
3.7.3. Blank	94
3.7.4. Alternative Method	95
3.7.5. Alternative Detection	95
3.7.6. Reference Materials.	96
3.7.7. Collaborative Studies	96
3.8. What Can Go Wrong?	99
3.8.1. Classical Methods.	99
3.8.2. Instrumental Techniques.	100
References	101
4. Selecting Equipment and Consumables	103
4.1. Environment.	103
4.1.1. Factors Affecting Quality	104
4.1.2. Laboratory Design	104
4.1.3. Siting of Instruments	105
4.1.4. Monitoring Changes	105
4.2. Equipment and Glassware.	108
4.2.1. Selection.	108
4.2.2. Condition	110

4.2.3. Cleaning	111
4.2.4. Drying	111
4.3. Chemicals and Consumables	112
4.3.1. Grade	113
4.3.2. Labelling	116
4.3.3. Preparation	119
4.3.4. Manipulation.	120
4.3.5. Containers	121
4.3.6. Storage	123
4.3.7. Safety	124
4.3.8. Disposal	125
4.4. Maintenance and Calibration	126
References	128
5. Making Measurements and Reporting.	129
5.1. Good Laboratory Practice	129
5.1.1. Before Starting an Analysis	130
5.1.2. During the Analysis	132
5.1.3. After the Analysis	133
5.2. Calibration of Measurements	136
5.3. Chemical Standards and Reference Materials	138
5.3.1. Reference Materials.	138
5.3.2. Chemical Standards.	139
5.3.3. External Standardisation.	140
5.3.4. Internal Standardisation	140
5.4. Record Management	144
5.4.1. Records	144
5.4.2. Generating Records.	146
5.4.3. Record Identification	146
5.4.4. Copying Records	147
5.4.5. Changing Records	148
5.4.6. Storing and Archiving Records	148
5.5. Quality Control	148
5.5.1. Blanks.	150
5.5.2. Quality Control Samples.	150
5.5.3. Repeat Samples	151
5.5.4. Blind Samples	151
5.5.5. Standards and Spikes	151
5.6. Charting.	152
5.6.1. The Shewhart Chart.	153

5.6.2. Moving Average Chart	155
5.6.3. The CUSUM Chart	157
5.7. Reporting Results	163
6. Measurement Uncertainty	167
6.1. Defining Uncertainty	168
6.1.1. The Measurement Process	168
6.1.2. Uncertainty Definition	169
6.1.3. Errors	169
6.1.4. Random Error	170
6.1.5. Systematic Error	170
6.1.6. Accuracy and Precision	172
6.2. Evaluating Uncertainty	176
6.2.1. Possible Computation Errors	176
6.2.2. A Systematic Approach	177
6.2.3. Specification	177
6.2.4. Identification	178
6.2.5. Quantification	180
6.2.6. Combination	184
6.2.7. Expanded Uncertainty	193
6.2.8. Short Cuts in Calculations	195
6.3. Automating Uncertainty Calculations	199
6.4. Putting Uncertainty to Use	202
6.4.1. Interpretation of Results	202
6.4.2. Improving the Quality of Results	208
7. Quality Systems in Chemical Laboratories	211
7.1. The Quality System and the Quality Manual	212
7.2. The Costs and Benefits of Introducing a Quality System	213
7.2.1. The Benefits of a Quality System	213
7.2.2. The Costs of a Quality System	214
7.3. Types of Quality Standards for Laboratories	218
7.3.1. Assessing Quality Systems Against Quality Standards	220
7.3.2. The GLP Scheme	221
7.3.3. BS 5750	222
7.3.4. NAMAS	223
7.4. Principles of GLP Compliance and NAMAS Accreditation	225
7.4.1. GLP Requirements	225

7.4.2. NAMAS Requirements	228
7.5. Quality Audits and Quality System Reviews	231
7.5.1. The Importance of Quality Audits and Quality System Reviews	232
7.5.2. Responsibility for Internal Quality Audits	233
7.5.3. Planning of Internal Quality Audits	234
7.5.4. Training of Quality Auditors	235
7.5.5. Conduct of Internal Quality Audits	235
7.5.6. Coverage of Internal Quality Audits	238
7.5.7. The 'Vertical Audit'	239
7.5.8. Quality System Review.	239
7.5.9. Responsibility for Quality System Reviews	245
7.5.10. Organisation and Coverage of Quality System Reviews	245
7.6. Responsibilities of Laboratory Staff for Quality	240
7.6.1. Laboratory Management's Responsibilities for Quality	246 ✓
7.6.2. The Quality Manager's Responsibilities	248
7.6.3. Responsibilities of Individual Members of Staff.	248
References	249

Appendix

1. Critical Values for Student's <i>t</i> Tests	251
2. A Selection of UK Acts and Regulations which Govern Permitted Levels of Analytes	254
3. Some Sources of Reference Materials.	255
Self-assessment Questions and Responses	257
Units of Measurement	299
Index.	305
