

CONTENTS

CHAPTER 1. INTRODUCTION	1
CHAPTER 2. INSTRUMENTATION	8
Infrared Physics	8
Sequential IR Spectrometers	15
Spatial Detection Spectrometers	24
Multiplex Spectrometers	24
Selection of a Spectrometer	34
Performance Criteria	35
CHAPTER 3. SPECTROSCOPIC LITERATURE	57
CHAPTER 4. SAMPLING TECHNIQUES	73
Solutions	73
Films	77
Mulls	77
Attenuated Total Reflectance	84
Gas Sampling	96
Special Sampling Methods	97
Cell Construction and Maintenance	111
CHAPTER 5. QUALITATIVE APPLICATIONS	123
Group Frequencies: Uses and Limitations	140
Interpretation of Spectra	171
Summary-Check List for Unknown Identification	185
Applications	186
Frequency Assignments	200
CHAPTER 6. QUANTITATIVE APPLICATIONS	219
Use of IR in Quantitative Analysis	219
Laws of Absorption	220
The Practice of Quantitative Analysis	223
Calculations	243
Special Problems and Techniques	251
Kinetic Studies	268
