

## CONTENTS

|   |      |
|---|------|
| Preface   | xi   |
| Introductory Remarks  | xiii |
| <b>CHEMICAL BONDING</b>   |      |
| 1. Application of molecular orbital calculations to mossbauer and NMR spectroscopy of halogen-containing compounds                              | 3    |
| 2. Application of gold-197 mossbauer spectroscopy to studies of electronic properties of intermetallic, inorganic, and organometallic compounds | 39   |
| <b>CONVERSION ELECTRON MOSSBAUER SPECTROSCOPY</b>   |      |
| 3. Conversion electron mossbauer spectroscopy and its recent development  | 63   |
| 4. The use of conversion electron mossbauer spectroscopy to study ion-implanted alloys and archaeological materials                             | 101  |
| 5. Conversion electron mossbauer spectroscopy of europium-151 and thulium-169   | 117  |
| 6. Electron spectrometer for iron-57 mossbauer spectroscopy   | 125  |
| <b>ENVIRONMENTAL APPLICATIONS</b>   |      |
| 7. Application of mossbauer spectroscopy to coal characterization and utilization   | 135  |
| 8. Quantitative investigations of pyrite and coal   | 177  |
| 9. Mossbauer effect study of victorian brown coal   | 209  |
| 10. Qualitative and quantitative analysis of iron-bearing minerals in fossil fuels and petroleum source rock by iron-57 mossbauer spectroscopy  | 221  |
| 11. Mossbauer spectroscopic analysis of iron oxides in soil   | 247  |
| <b>ANALYTICAL APPLICATIONS</b>  |      |
| 12. Applications of mossbauer spectroscopy in the steel industry  | 265  |
| <b>BIOLOGICAL APPLICATIONS</b>  |      |
| 13. Novel iron-sulfur clusters  | 305  |
| <b>ISOTOPES OTHER THAN IRON-57 AND TIN-119</b>  |      |
| 14. Mossbauer effect in zinc-67   | 329  |
| 15. Covalency of neptunium (IV) organometallics from neptunium-237 mossbauer spectra  | 347  |
| 16. Characterization of novel antimony compounds by antimony-121 mossbauer spectroscopy   | 361  |
| 17. Application of iodine-129 mossbauer spectroscopy to some anions and cations of iodine   | 375  |
| 18. Tellurium-125 and iodine-129 mossbauer study of the high-pressure phase transition of tellurium   | 393  |

## PHASE ANALYSIS

- |   |     |
|---|-----|
| 19. Recent investigations of spin crossover   | 405 |
| 20. A high-pressure mossbauer effect study of the spin state in bis[hydrotris (3,5-dimethyl-<br>l-pyrazolyl) borate]iron (II) | 453 |
| 21. Relaxation effects associated with magnetic phase transitions   | 463 |
| 22. Tantalum-181 mossbauer studies of the alkali tantalates : ferroelectric phase transition<br>in LiTaO <sub>3</sub>         | 481 |

## ENERGY AND CATALYST APPLICATIONS

- |   |     |
|---|-----|
| 23. Hydrogen storage materials  | 501 |
| 24. Mossbauer studies of battery materials  | 523 |
| 25. Mossbauer studies of colloidal catalyst solutions used in metallization of plastics   | 539 |
| 26. Characterization of mixed-metal catalysts by iron-57 and ruthenium-99 mossbauer<br>spectroscopy   | 553 |
| 27. Mossbauer and magnetic studies of bifunctional medium-pore zeolite-iron catalysts<br>used in synthesis gas conversion                     | 573 |
| 28. Mossbauer spectroscopic investigations of oxidation catalysts   | 589 |
| 29. A mossbauer investigation of $\alpha$ -Fe <sub>2</sub> O <sub>3</sub> microcrystals supported on $\gamma$ -Al <sub>2</sub> O <sub>3</sub> | 609 |
| Concluding remarks  | 619 |
| index   | 625 |
