

## CONTENTS

**PART I: OPTIMIZATION AND EXPLORATORY DATA ANALYSIS**

Chapter 1	Development of an AI-Based Optimization System for Tandem Mass Spectrometry	3
Chapter 2	Curve Fitting and Fourier Self-Deconvolution for the Quantitative Representation of Complex Spectra	29
Chapter 3	Evolutionary Factor Analysis in Analytical Spectroscopy	55
Chapter 4	Numerical Extraction of Components from Mixture Spectra by Multivariate Data Analysis	67
Chapter 5	Simultaneous Multivariate Analysis of Multiple Data Matrices	103
Chapter 6	Multivariate Calibration: Quantification of Harmonies and Disharmonies in Analytical Data	121

**PART II: SPECTRAL INTERPRETATION AND LIBRARY SEARCH**

Chapter 7	Automated Spectra Interpretation and Library Search Systems	145
Chapter 8	Carbon-13 Nuclear Magnetic Resonance Spectrum Simulation	163
Chapter 9	The Evolution of an Automated IR Spectra Interpretation System	183
Chapter 10	Novel Advances in Pattern Recognition and Knowledge-Based Methods in Infrared Spectroscopy	201
Chapter 11	Library Storage and Retrieval Methods in Infrared Spectroscopy	223
Chapter 12	Synergistic Use of Infrared, <sup>13</sup> C Nuclear Magnetic Resonance, and Mass Spectral Data in Analysis Schemes for the Identification of Organic Mixture Components	239
