

CONTENTS

CHAPTER 1: Terminology and Definitions in Vibrational Spectroscopy	1
CHAPTER 2: Group Frequency Correlation Table	25
CHAPTER 3: Selected Properties of Infrared Transmitting Materials	45
CHAPTER 4: Spectra of Solvents and Frequently Encountered Contaminants	55
CHAPTER 5: Dispersive Infrared Spectrometers	85
CHAPTER 6: Mid-infrared Fourier Transform Spectrometry	121
CHAPTER 7: Quantitative Analysis from the Infrared Spectrum	145
CHAPTER 8: Simple Sampling	203
CHAPTER 9: Preparation of Polymer Samples for IR Examination	217
CHAPTER 10: Reflection Spectroscopy	229
CHAPTER 11: Micro-sampling Methods in Infrared Spectroscopy	251
CHAPTER 12: Techniques for Vibrational Spectroscopic Measurements under High Pressures	281
CHAPTER 13: Matrix Isolation	309
CHAPTER 14: Modern Methods for GC/IR and GC/FT-IR	327
CHAPTER 15: Capillary GC/FT-IR	351
CHAPTER 16: Species Adsorbed at Surfaces	363
CHAPTER 17: Reactive, Unstable, Explosive and Energetic Materials	411
CHAPTER 18: Infrared Spectroscopy of Inorganic Compounds	425
CHAPTER 19: Methods of Obtaining Spectra at High and Low Temperatures	451
CHAPTER 20: The Infrared Emission Spectrum	473
CHAPTER 21: Raman Instrumentation	483
CHAPTER 22: Raman Sampling	495
CHAPTER 23: Concise Theory of Infrared Spectroscopy	519
