

CONTENTS

Chapter 1	Chemical Applications of Molecular Spectroscopy-A Developing Perspective	1
Chapter 2	Recent Advances in Vibrational Spectroscopy	43
Chapter 3	Infrared Sampling Methods	67
Chapter 4	Electronic Absorption Spectroscopy: Theory and Practice	87
Chapter 5	Luminescence Spectroscopy	103
Chapter 6	An Introduction to Nuclear Magnetic Resonance in Fluids	137
Chapter 7	Multinuclear High-Resolution NMR in Solids	155
Chapter 8	Principles and Techniques of Laser Spectroscopy	185
Chapter 9	Raman Spectroscopy	225
Chapter 10	Natural and Magnetic Circular Dichroism Spectroscopies	243
Chapter 11	Mass Spectrometry	261
Chapter 12	Electron Paramagnetic Resonance and Electron Nuclear Double Resonance Spectroscopy	295
Index		321
