

## CONTENTS

|  |     |
|--|-----|
| 1. General Aspects of Luminescence Spectroscopy  | 1   |
| 2. Instrumentation for Fluorescence  | 41  |
| 3. Effects of Molecular Structure on Fluorescence and Phosphorescence                    | 75  |
| 4. Effects of Molecular Environment on Fluorescence and Phosphorescence                  | 127 |
| 5. Inorganic Substances  | 185 |
| 6. Assay of Organic Compounds  | 231 |
| 7. Applications of Fluorescence and Phosphorescence Techniques to Environmental Analysis | 367 |
| 8. Phosphorescence in Chemical Analysis  | 431 |
| 9. Fluorescence Analysis of Pesticides and Enzyme-Related Substrates on Solid Surfaces   | 499 |
| 10. Chemiluminescence and Photobiosensors  | 543 |
| 11. Fluorescence of Proteins and Peptides  | 575 |
| 12. Fluorescence in Enzymology   | 683 |
| 13. Fluorescence Sensors for Monitoring Bioprocesses                                     | 775 |
| Index  | 795 |
