

CONTENTS

I.	Theory. Protein structure analysis. Membrane proteins.	1
II.	Photosynthetic reaction systems	41
III.	Crystallography. Time-resolved spectroscopy. Chirality.	99
IV.	Phospholids and membranes. Carbohydrates. Rhodopsins.	145
V.	NMR. Enzyme characterization.	217
VI.	Metalloproteins. Whole cells. Biomedical applications.	275
VII.	Nucleic acids and their interaction with proteins and drug molecules	335
VIII.	Haem proteins and related systems	409
