

CONTENTS

<b>I. Introduction</b>	<b>1</b>
<b>II. Theory</b>	<b>3</b>
A. Physical Basis of Atomic Fluorescence in Hot Gases	3
B. Physical Basis of Molecular Luminescence in Solution	32
C. General Luminescence Radiance Expressions	81
D. Production of Species to be Excited in Luminescence Spectrometry	120
<b>III. Instrumentation and Methodology</b>	<b>140</b>
A. General Luminescence Instrumentation	140
B. Atomic Fluorescence Instrumentation	188
C. Molecular Luminescence Instrumentation	200
D. Signal-to-Noise Ratio Theory	209
E. Methodology	226
<b>IV. Analytical Use of Luminescence Spectrometry</b>	<b>245</b>
A. Atomic Fluorescence Spectrometry	245
B. Solution Fluorimetry and Phosphorimetry	269
C. Comparison of Methods of Luminescence Spectrometry	310
