

CONTENTS

Introduction	1
The General Technique of Graded Cathode Potential Electrolysis	2
Automatic Cathode Potential Control. The Diehl Apparatus	8
D.C. Output Circuit	11
Control Circuit	11
Vacuum Tube Voltmeter	14
Auxiliary Equipment	15
Operation	15
Other Apparatus for Automatic Cathode Potential Control	20
Polarization	20
The Brown Electrode	24
Anodic Reoxidation	25
Silver	32
Copper	34
Bismuth	42
Antimony	45
Lead	46
Tin	47
Nickel	50
Cadmium	51
The Analysis of Bearing Metals, Brass, and Bronze	55
