

## CONTENTS

<b>1. Fundamentals</b>	<b>1</b>
1.1 Introduction	1
1.2 Quantum numbers, energy levels and things	2
1.3 Nuclear spins interacting with a magnetic field	3
1.4 Nuclear magnetic resonance spectroscopy	6
1.5 Nuclear spins and their surroundings	7
1.6 Chemical Shielding	8
1.7 Scalar Coupling	10
1.8 Second order couplings	17
1.9 Natural abundance	19
1.10 Relaxation	21
1.11 Experimental methods	25
1.12 The vector model and the rotating frame	26
<b>2. Structure Determination</b>	<b>31</b>
2.1 Introduction	31
2.2 Interpretation of an NMR spectrum	31
2.3 General trends in the chemical shift	35
2.4 General trends in the coupling constant	41
2.5 Relaxation and structure	48
2.6 Multiple pulse methods	52
<b>3. Dynamic processes and NMR</b>	<b>59</b>
3.1 Introduction	59
3.2 Some theory	60
3.3 Determination of the thermodynamic and kinetic parameters of exchange	63
3.4 Effect of dynamic processes on relaxation	67
3.5 Saturation transfer	68
3.6 Effect of exchange on spin-spin coupling	73
3.7 2-D methods for studying exchange	75
<b>4. The solid state</b>	<b>80</b>
4.1 Introduction	80
4.2 Nuclear interactions in the solid state	81
4.3 Magic angle spinning	84
4.4 Cross polarization	85
Bibliography	87
Index	88
