

CONTENTS

The Evolution of Cereal Protein Analysis by HPLC	1
Practical Considerations in the RP-HPLC Analysis of Cereal and Legume Proteins	15
Protein Extraction and Sample Handling Techniques	51
Data Handling in HPLC and Use of Computers	67
RP-HPLC for Varietal Identification in Cereals and Legumes	97
Wheat	97
Rye and Triticale	121
Maize	135
Barley	162
Rice	175
Oats	184
Soybeans	190
Sorghum	201
RP-HPLC for Assessment of Quality in Cereals and Legumes: Breadmaking Quality (Wheat)	206
Use of RP-HPLC for a Better Understanding of the Structure and Functionality of Wheat	
Gluten Proteins	235
Combined Reversed-Phase High-Performance Liquid Chromatography (RP-HPLC) and	
Electrophoretic Techniques in Genetics and Breeding of Wheat Storage Proteins	273
Size-Exclusion High-Performance Liquid Chromatography for Rapid Examination of Size	
Differences of Cereal Proteins	326
HPLC Ion-Exchange Chromatographic Separations of Cereal and Legume Proteins	373
Evaluation of Hydrophobicity of Wheat Proteins and Peptides by HIC and RP-HPLC	393
