

CONTENTS

Part 1 Contemporary LC Techniques in Pharmaceutical Analysis

- | | |
|--|----|
| 1. High Speed HPLC Using Short Columns Packed with 3 μm Particles | 3 |
| 2. Microbore HPLC in Pharmaceutical Analysis | 25 |
| 3. Column Switching Techniques in Pharmaceutical Analysis | 41 |

Part 2 Specialized Detection Techniques

- | | |
|--|-----|
| 4. Liquid Chromatography/Electrochemistry in Pharmaceutical Analysis | 65 |
| 5. Radiochemical Quantitation: Considerations for HPLC | 101 |
| 6. HPLC with Computerized Diode Array Detection in Pharmaceutical Research | 123 |
| 7. Design and Application of HPLC/FT-IR | 147 |

Part 3 Automation in Pharmaceutical Analysis

- | | |
|---|-----|
| 8. Application of HPLC to Dissolution Testing of Solid Dosage Forms | 173 |
| 9. Robotic Automation of HPLC Laboratories | 185 |

Part 4 HPLC of Peptides, Proteins, and Enantiomeric Drugs

- | | |
|---|-----|
| 10. Liquid Chromatographic Resolution of Enantiomers of Pharmaceutical Interest | 211 |
| 11. HPLC of Proteins and Peptides in the Pharmaceutical Industry | 241 |

- | | |
|-------|-----|
| Index | 303 |
