

CONTENTS

1. Review of the Development of Liquid Chromatography/Mass Spectrometry	1
AGROCHEMICALS: PESTICIDE METABOLISM AND DEGRADATION	
2. Techniques for Enhancing Structural Information from High-Performance Liquid Chromatography/Mass Spectrometry	14
3. Confirmation of Pesticide Residues by Liquid Chromatography/Tandem Mass Spectrometry	40
4. Use of Solvent Adduct Ions To Confirm Structure of Selected Herbicides with Thermospray Liquid Chromatography/Mass Spectrometry	48
5. Analysis of Chlorinated Herbicides by High-Performance Liquid Chromatography/Mass Spectrometry	62
6. Multiresidue Analysis of Thermally Labile Sulfonylurea Herbicides in Crops by Liquid Chromatography/Mass Spectrometry	75
7. Applications of Liquid Chromatography/Negative Ion Mass Spectrometry in Studies of Herbicide Metabolism	92
PHARMACEUTICALS AND METABOLISM	
8. Analysis of Xenobiotic Conjugates by Thermospray Liquid Chromatography/Mass Spectrometry	124
9. Qualitative Analysis of Pharmaceuticals by Thermospray Liquid Chromatography/Mass Spectrometry: Nematocytins and Tetracyclines	140
10. Quantification of Endogenous Retinoic Acid in Human Plasma by Liquid Chromatography/Mass Spectrometry	166
11. Liquid Chromatography/Mass Spectrometry in Bioanalysis	179
12. Monitoring In Vivo Cyclic Acetylation and Deacetylation of the Anticonvulsant LY201116 in Rats: Use of D ₃ -N-acetyl LY201116 and Liquid Chromatography/Mass Spectrometry/Thermospray Mass Spectrometry	190
ENVIRONMENTAL ANALYSIS	
13. Analysis of Target and Nontarget Pollutants in Aqueous and Hazardous Waste Samples by Liquid Chromatography/Particle Beam Mass Spectrometry	198
14. Application of Combination Ion Source To Detect Environmentally Important Compounds	215
15. Particle Beam Liquid Chromatography/Mass Spectrometry of Phenols and Their Sulfate and Glucuronide Conjugates	232
16. Mass Spectrometry of the Secondary Metabolites of Benzo [a] pyrene: Ionization from Liquid Matrices	245
17. Anion Exchange Thermospray Tandem Mass Spectrometry of Polar Urinary Metabolites and Metabolic Conjugates	253
18. Structural Studies of In Vitro Alkylation of Hemoglobin by Electrophilic Metabolites	270
