

**CONTENTS**

1. Chromatography Systems – Design and Control	1
2. The Practical Application of Theory in Preparative Liquid Chromatography	33
3. Alternative Modes of Operation of Chromatography Columns in the Process Situation	71
4. Process Scale Size Exclusion Chromatography	81
5. Polymers and their Application in Liquid Chromatography	99
6. Biochemical Applications of Process-Scale Ion-Exchange Liquid Chromatography	131
7. Instrumental Design and Separation in Large Scale Industrial Supercritical Fluid Chromatography	153
8. Scaling-up to Supercritical Fluid Chromatography to Large-Scale Applications	163
9. Affinity Chromatography and its Applications in Large-Scale Separations	193
Index	215
