

CONTENTS

Part I: Principles and Practice of Thin-Layer Chromatography

1. Basic Techniques, Materials, and Apparatus	3
2. Theory and Mechanism of Thin-Layer Chromatography	43
3. Optimization	71
4. Sorbents and Precoated Layers in Thin-Layer Chromatography	87
5. Instrumental Thin-Layer Chromatography	113
6. Gradient Development in Thin-Layer Chromatography	135
7. Overpressured Layer Chromatography	155
8. Thin-Layer Chromatography Coupled with Mass Spectrometry	183
9. Photographic Documentation of Thin-Layer Chromatograms	211
10. Theoretical Foundations of Optical Quantitation	249
11. Preparative Layer Chromatography	283
12. Thin-Layer Radiochromatography	317
13. Applications of Flame Ionization Detectors in Thin-Layer Chromatography	339

Part II: Applications of Thin-Layer Chromatography

14. Amino Acids and Their Derivatives	353
15. Peptides and Proteins	389
16. Antibiotics	407
17. Carbohydrates	439
18. Inorganics and Organometallics	463
19. Enantiomer Separations	541
20. Lipids	593
21. Natural Pigments	625
22. Pesticides	663
23. Pharmaceuticals and Drugs	717
24. Phenols, Aromatic Carboxylic Acids, and Indoles	757
25. Polymers and Oligomers	807
26. Application of TLC and HPTLC for the Detection of Aberrant Purine and Pyrimidine Metabolism in Man	863
27. Steroids	907
28. Synthetic Dyes	939
29. Toxins	971
30. Hydrophilic Vitamins	987
31. Lipophilic Vitamins	993
