

CONTENTS

1. Lasers and Thin Layer Chromatography: Present and Future	1
2. Bonded Stationary Phases for Reversed-Phase Thin Layer Chromatography	25
3. A Systematic Approach to Mobile Phase Design and Optimization for Normal and Reversed-Phase Chromatography	37
4. Rotating-Disk Thin Layer Chromatography	51
5. Time-Optimized Thin Layer Chromatography in a Chamber with Fixed Plate Lengths	57
6. Spectral Analysis of Thin Layer Chromatography Bands	69
7. Quantitativeness of Scanning Densitometry	77
8. Thin Layer Chromatography on Chemically Bonded Phases--A Comparison of Precoated Plates	87
9. Discovery of New Compounds by Thin Layer Chromatography	109
10. New Methods in Analyzing Radiochromatograms and Electropherograms	119
11. A Basic System for Quantitative Thin Layer Chromatography, Part I: Preparing the Chromatograms	139
12. A Basic System for Quantitative Thin Layer Chromatography, Part II: Data Acquisition, Computing, and Reporting	161
13. Characterizing C ₁₅₊ Fractions of Crude Petroleum by Thin Layer Chromatography	175
14. Characterizing High-Boiling Fractions of Refined Petroleum by Thin Layer Chromatography	197
15. Thin Layer Chromatography--Densitometric Determination of Nitrite in Saliva	215
16. Practical Considerations in Quantitating Gangliosides by High-Performance Thin Layer Chromatography	223
17. Analysis of L-Alanine N-Carboxyanhydride by Quantitative Thin Layer Chromatography	235
18. Quantitative Aspects of Thin Layer Chromatography-FID of Polymers	243
19. Lipids of Human Milk	261
20. Reversed-Phase Thin Layer Chromatography Selection of Cephalosporium Mutants	279
21. Quantification of Phospholipids and Lipids in Saliva and Blood by Thin Layer Chromatography with Densitometry	291
22. Comparative Analysis of Tocopherols by Thin Layer Chromatography and High-Performance Liquid Chromatography	305
23. Simultaneous Purification and Analysis of Skin Surface Phospholipids	317
24. Thin Layer Chromatography of Nucleotides and Nucleosides	331
25. Direct Microanalysis of Lipids in Cultured Cells by Thin Layer Chromatography	343
26. Industrial Applications of Quantitative Thin Layer Chromatography	357
27. Direct Determination of Plasmalogens on Thin Layers	371
28. Separation and Quantitation of Anionic, Cationic, and Nonionic Surfactants by Thin Layer Chromatography	379
Index	389
