

CONTENTS

1. The Role of Gas Chromatography Among Other Methods of Instrumental Analysis	1
2. Design and Functions of Instrumentation for Gas Chromatography	5
3. The Basic Theory of Chromatographic Separations	9
4. The Gas Chromatogram	15
5. Elements and Parameters of Gas Chromatographic Instrumentation	31
6. Methods of Qualitative and Quantitative GC Analysis of Mixtures	85
7. Special Methods, Auxiliary Techniques and Applications of Gas Chromatography	123
8. Sources of Analytical Error in Gas Chromatographic Systems: Elucidation and Elimination	155
9. Analytical Supercritical Fluid Chromatography	175
10. The Coupling of LC and GC	189
11. Gas Chromatographic Applications Using Different Methods and Techniques	197
12. Important Equations and Terminology of Gas Chromatography	291
13. List of Symbols and Acronyms	311
14. Index	313
