

CONTENTS

1. Atomic Spectral Chromatographic Detection: An Overview	1
2. Atomic Emission Spectrometry with Helium Plasmas for Liquid and Supercritical-Fluid Chromatography	25
3. Quantitative Characteristics of gas Chromatography with Microwave-Induced Plasma Detection	44
4. Characterization of Interferences Affecting Selectivity in Gas Chromatography-Atomic Emission Spectrometry	62
5. Microwave-Induced Plasma-Atomic Emission Detection for Organometallic Gas and Supercritical-Fluid Chromatography: Sample Handling and Instrument Comparisons	90
6. Optical-System Developments for Plasma Emission Detection in High-Resolution Gas Chromatography	105
7. Atomic Emission Detectors for Gas Chromatography: Twelve Years of Industrial Experience	117
8. Analytical Problem Solving with Simultaneous Atomic Emission-Mass Spectrometric Detection for Gas Chromatography	132
9. An Element-Specific Detector for Gas Chromatography Based on a Novel Capacitively Coupled Plasma	152
10. Alternating-Current Plasma Detection for Gas Chromatography and High-Performance Liquid Chromatography	170
11. Helium Surface-Wave Plasmas as Atomic Emission Detectors in Gas Chromatography	189
12. Helium Discharge Detector for Gas Chromatography	205
13. Inductively Coupled Plasma Atomic Emission Spectrometry and Packed-Microcolumn Supercritical-Fluid Chromatography	218
14. Helium High-Efficiency Microwave-Induced Plasma as an Element-Selective Detector for Packed-Column Supercritical-Fluid Chromatography	242
15. Trace Selenium Speciation via High-Performance Liquid Chromatography with Ultraviolet and Direct-Current Plasma Emission Detection	257
16. Analytical Utility of an Inductively Coupled Plasma-Ion Chromatographic System for the Speciation and Detection of Transition Metals	275
17. Chromatographic Detection by Plasma Mass Spectrometry	288
18. Element-Specific Detection of Metallodrugs and Their Metabolites: High-Performance Liquid Chromatography-Inductively Coupled Plasma Mass Spectrometry	309
19. A Fiber-Optic Spectrochemical-Emission Sensor as a Detector for Volatile Chlorinated Compounds	326
