

## CONTENTS

### **PART I: BASIC PRINCIPLES**

- |                               |    |
|-------------------------------|----|
| 1 Chromatography: an overview | 23 |
| 2 Theoretical concepts        | 54 |

### **PART II: GAS CHROMATOGRAPHY**

- |  |     |
|--|-----|
| 3 Gas chromatography I: general features and inlet systems | 89  |
| 4 Gas chromatography II: separation systems                | 128 |
| 5 Gas chromatography III: detection systems                | 160 |

### **PART III: LIQUID CHROMATOGRAPHY**

- |  |     |
|--|-----|
| 6 Liquid chromatography I: principles and methods          | 193 |
| 7 Liquid chromatography II: instrumentation and techniques | 295 |
| 8 Planar chromatography                                    | 364 |

### **PART IV: APPLICATIONS**

- |                                  |     |
|----------------------------------|-----|
| 9 Applications of chromatography | 403 |
|----------------------------------|-----|
