

CONTENTS

Chapter 1	Introduction	1
Chapter 2	Introduction to Optical Methods	7
Chapter 3	The Absorption of Radiation: Ultraviolet and Visible	32
Chapter 4	The Absorption of Radiation: Infrared	78
Chapter 5	Atomic Absorption	109
Chapter 6	Molecular Luminescence: Fluorimetry, Phosphorimetry, and Raman Spectroscopy	124
Chapter 7	Photoacoustic Spectroscopy	147
Chapter 8	The Scattering of Radiation	154
Chapter 9	Atomic Emission Spectroscopy	160
Chapter 10	Polarimetry, Optical Rotatory Dispersion, and Circular Dichroism	178
Chapter 11	X-Ray Methods	188
Chapter 12	Electron and Ion Spectroscopy	215
Chapter 13	Magnetic Resonance Spectroscopy	237
Chapter 14	Introduction to Electrochemical Methods	261
Chapter 15	Potentiometry	274
Chapter 16	Voltammetry, Polarography, and Related Methods	289
Chapter 17	Electrodeposition and Coulometry	320
Chapter 18	Conductimetry	332
Chapter 19	Introduction to Chromatography	340
Chapter 20	Gas Chromatography	348
Chapter 21	Liquid Chromatography	375
Chapter 22	Mass Spectrometry	395
Chapter 23	Thermometric Methods	429
Chapter 24	Nuclear Methods	444
Chapter 25	Automatic Analyzers	469
Chapter 26	General Considerations in Analysis	480
Chapter 27	Electronic Circuitry for Analytical Instruments	489
Chapter 28	Computers in Analytical Instrumentation	521
